HISTORY MILL MAKING RECORD

Baltimore Deadlock Recalls Other Days.

Maryland City Scene of Other Important Deadlocks in Party's Record.

Baltimore, Md., June 30.—Consider the Democrats, how they fight. This is the best time in the world to gauge and reflect that we are in the midst of the grandest little convention these United States have ever seen. History is being made as it never was made before. The history factory is running night and day. To wait and contemplate it after it is all over would be opportunity wasted. To prophesy the outcome at this point would be sheer recklessness. But reflection on what is now before us and in comparison with events of years gone by, are perfectly safe, proper and interesting activities.

When the delegates today began gathering in the twenties on their ballots there was every indication they were after a record. They did pretty well. Early in the day they knocked over every high mark established by their fellow Democrats since 1858.

In that year Horatio Seymour was nominated on the twenty-seventh ballot. Mr. Seymour was defeated for the presidency by Gen. Grant.

The convention was held in New York. If the present convention achieves itself with beating the 1888 record, all will be fairly well. But if it tried to outdo the exercises held right here in Baltimore in 1876, some will be fairly well and enthusiasm. In 1876 the Democrats held two conventions. They started in Charleston, expecting a close and a profitable experience. Under the guidance of Southern men they began voting on candidates. They voted and continued to vote until they had voted fifty-seven times.

Then the impression got about that such was no way, and they split. It was no tea party affair. It was the kind that means defeat for presidency. The two factions held convention in Baltimore. One nominating Douglas and the other Breckinridge. It happened that Abraham Lincoln beat them both.

The next previous high mark established by the Democrats was in Cincinnati, in 1856. They took sixteen ballots without result. On the seventeenth James Buchanan was nominated. He was elected, too.

Fourteen years ago in this same city, the Democrats went up to the forty-ninth ballot before they chose their candidate, Franklin Pierce was the man. Baltimore was the scene of the only other deadlock of importance in 1841, when it took nine ballots to nominate James K. Polk.

It was in Baltimore that the Democrats were tied up in 1841; it was in Baltimore that they were deadlocked in 1852; it was in Baltimore that they turned the corner and went backwaters in 1860; and it is in Baltimore now that they are having trouble.

It's the same old Baltimore, Maryland. If any one can give assurance that there is nothing in a name, now is a good time for him to sleep forward. The rank and file of the Democrats—those who are back home now, playing on the tender hooks and serving homestead on the front porch—are not the only ones who view this performance with regret. The delegates themselves are not the most cheerful individuals in the world.

Gone are the parades, the bands, and the thousands of spectators who came here with horns and banners and a large supply of optimism. Gone is hope and gone is money. All that are left are delegates, alternates, newspaper correspondents and gloom.

A candidate can be nominated without the aid of parades, bands and rollers.

It's a pinch a very short step forward might be made without the cooperation of the newspaper correspondents. But no one—he he delegates, alternates, any one else—can proceed without money and particularly in Baltimore. Where before the banking tides crowded with money representatives of the people, they are now standing aloof, by the curb, and those who were their occupants are plodding pain-

fully back and forth, restless and discontented along the burning tracks. Where yesterday the mirrored cafes were crowded with hilarious visitors, they now echo the lonely tread of sleepy waiters. The orchestra players nod at their staves.

The door men yawn. The messenger boys are sleepy. Only proprietors are alert and they are figuring up their receipts for the week just closed. It's a pity that such is the case. It is particularly unfortunate that the waiters are sleepy. When wide awake, there is no one so wise as a waiter. It was a waiter who first let the world know that something was to break, when the convention had been holding fruitlessly all day yesterday and sadness filled our hearts.

A weary newspaper man entered the dining room and sank into a chair. It was the wretched hour of midnight. It was cloudy and hot. The rubber footed waiter approached. He asked the waiter. The sound was refreshing.

"There's going to be a break in the voting," said the waiter as one who carries a message.

"Say?" inquired the guest, politely.

"Any minute," said the waiter, confidently.

"Where do you get it?" asked the newspaper man.

The waiter pointed to the clock. It was five minutes after twelve.

"The Irish wouldn't switch on Friday. It's Saturday now."

When the newspaper man left the dining room he hurried to the convention hall. At 12 o'clock the entire New York vote, 30 in all, had deserted Harrison for Clark, giving the Speaker a majority.

The waiter has since become famous in these parts.

Will Get Insurance Money.

Mr. Munson, an insurance collector, was in this city Tuesday and Wednesday taking part of the fire which destroyed Hartford College recently. It was in consultation with Mr. A. C. Volter, local agent for the Aetna Company, and also members of the Board of Education.

Before leaving town Wednesday Mr. Munson said that he had made out a report, and recommended that the loss be paid in full and at once, so in a few days checks for \$8,000 will be turned over to the Board of Education.

Marshal for Vice-President.

At three o'clock Wednesday morning Gov. Marshall, of Indiana, was selected as the nominee for vice presidency. The selection was made upon the second ballot and was unanimous. The platform was adopted after the selection of Gov. Marshall.

Iron Bridge is Completed.

The new iron bridge across the Hartford and Centerville road below Hartford, was completed Monday, and the motorists have left for another city. The bridge would have been completed sooner, but the heavy rains interfered considerably.

Will Visit Old Country.

The following from the Presser, Wash., D.C., concerning Mr. H. E. Carter, of Presser, Washington, who is a nephew of Mr. Alf. Carter, of near town, will be of interest.

Thomas E. Carter and Carl Jensen will leave tomorrow for New York city, where they will take the steamer for Europe, and expect to be gone until the first of next September.

This will be Mr. Carter's first trip to the old country and he is anticipating an enjoyable vacation this summer. The last two summers he was spent in California and since selling his property in this section he has visited every state in the union except the six New England states, and those will be visited before his return to Presser. He will visit a brother in Kentucky and other relatives in Illinois. Mr. Carter has also visited many other countries in North America, and this about completes his journey around the world.

Mr. Jensen will visit his daughter in Copenhagen, Denmark, who is attending school, and he and Mr. Carter will journey through Denmark, Germany, Norway, England, and France.

Mr. Carter came to Washington in 1888 and has been a holder of considerable property up to six years ago when he sold his large horse heaven farms.

Ohio County Medical Society.

The regular meeting of the Ohio County Medical Society will be held at Beaver Dam on July 11. All members are urged to attend.

INVENTOR OF WIRELESS TELEGRAPHY

Signor G. Marconi, who first made wireless telegraphy a practical affair, was one of the important witnesses before the congressional committee that investigated the Titanic disaster. He arrived in America from Europe only a short time before the loss of the great liner, and personally superintended the wireless work that followed the catastrophe.

WILSON DEMOCRATIC NOMINEE FOR PRESIDENT

Was Selected on Forty-Sixth
Ballot—Gov. Marshall for
Vice-President.

Convention Hall, Baltimore, Md., July 2.—Woodrow Wilson, Governor of New Jersey, was this afternoon nominated for the presidency by the Democratic national convention. The nomination was made on the forty-sixth ballot. The deadlock that has prevailed for nearly a week was broken when the name of Oscar W. Underwood was withdrawn by Senator Bankhead, of Alabama. Then followed the withdrawal of Foss and the final vote, when Senator Stone refused unanimous consent to making the nomination unanimous after re-voting the Clark delegates. The forty-sixth ballot, which was a mere formality showed:

Wilson	300
Clark	91
Harrison	12
Absent	2

SUNNYDALE.

Mr. and Mrs. J. Baker, of Palestine, are visiting relatives near Sulphur Springs and this place. It will be remembered that they lived near here some years ago.

Mr. Hugh Bouch and family, of Taylor Mines, visited Mr. James Hoops last Saturday and Sunday.

Room to the wife of Mr. Horace Lockart, of near Sulphur Springs, on Sunday, June 23, a ten pound boy. Dr. Stewart, of Dundee, attending physician. Mother and child doing well.

Miss Altha Daffron, of Dundee, and Miss Rhea Daffron, of Dundee, were the guests of their parents, Mr. and Mrs. John Daffron, last Saturday and Sunday.

Mr. Tol Hays, of Owensboro is visiting relatives near this place.

TREASURY STARTS YEAR WITH RECORD IN CASH

Steel-Ribbed Vaults Hold Over
Ninety-nine Million As
Working Balance.

Washington, July 1.—Closing the fiscal year 1912 with a surplus of \$36,355,830, the Federal treasury opened the new year today with \$69,390,000 in its steel-ribbed vaults as a working balance. This is the largest amount of available cash the Government has possessed for months.

The receipts for the year amounted to \$69,140,000, as compared with \$70,372,000 for the fiscal year and 1911. The total disbursements of the year just closed reached \$61,805,000, against \$64,138,000 the previous year when the surplus was \$17,240,000.

The tax on corporations included \$28,541,000 as compared with \$33,517,000 in 1911.

The total amount in the general fund of the treasury today was \$164,261,000, against \$140,177,000 last year.

ADABURG.

Mr. J. A. Hayman went to Hartford Friday.

Mr. and Mrs. C. L. Patton and baby, Edna C. spent a few days last week with Mrs. Patton's parents, Mr. and Mrs. John Miller of Dundee.

Misses Gerety and Zola Hayman went to Whitesville Wednesday shopping.

Several from here attended the touch-and-election at Barnett's Creek Saturday.

Miss Ida Ray went to Owensboro Thursday where she will remain until after the Fourth.

Mrs. Mary Helm and children, Josie Orist C. and Anna Ida, visited Mr. and Mrs. Ben Helm Thursday.

Mr. J. L. and C. M. Patton made a business trip to Buford Friday.

Mrs. Myrtle White and children, Hope

Maymes, Charlie and Cooper have been visiting relatives in this vicinity for the past week.

Miss Gerety, Raymond and Mr. Ida D. Frank attended the singing convention at 18th Hill Sunday.

Mr. and Mrs. J. H. McKiff and daughter, Miss Violet Mr. and Mrs. H. C. Ford Saturday night and Sunday.

Mr. and Mrs. J. A. Haymond visited Mr. Hays Monday and family Sunday.

Master Willie Patton, of Ralph visited his grandmother, Mrs. Belma Patton Friday.

Mr. and Mrs. Clarence Patton visited relatives at this place Sunday.

Mr. and Mrs. Frank Westerfield visited Mr. Herbert Mitchell and family Sunday.

Misses Zola and Stude Hayman visited Misses Maybelle Cooper and Josie Helm Sunday.

Messrs Tom Helm and Ernest Westerfield went to Owensboro business last week.

County Court Last Monday.

In the matter of M. A. Barnard and others on petition to erect a levee on north side of Rough river, an order was taken to file commissioner's report, which is in course of preparation.

In the matter of the Com'th. vs. Jack Belms charged with selling liquor at Rockport—verdict of jury guilty, and punishment fixed at \$5. A motion for new trial made and will be heard by the County Judge July 10th.

Com'th. vs. Thomas Beasley charged with furnishing house in which whiskey is sold—continued to August term, Tuesday, second day.

Com'th. vs. Walter C. Park charged with gaming—plea of guilty and law and facts in the court and fined \$30. Fine suspended one month.

Com'th. vs. Bill Bennett charged with swindling—was arrested and lodged in jail Monday afternoon.

Com'th. vs. Earl Darnell charged with gaming—law and facts to the court and fined \$20.

Com'th. vs. J. T. Miles, &c., charged with a breach of the peace on tennis grounds, Williams Mines—verdict of jury, not guilty.

Dividend No. 4.

By order of Ohio Circuit Court, June term, 1912, I will at my office in Hartford, Ky., on the 10th day of July, 1912, pay a 5 per cent dividend on all claims properly verified and filed with me against the estate of the Ohio County Bank, assigned, except those where the claimant owes the estate in excess of their claim.

A. E. PATE, Assignee.

Francis Apologizes To Bryan for Indignity.

Baltimore, July 1.—A personal apology was made to William J. Bryan tonight by former Governor David E. Francis, of Missouri, who said he was not in the convention hall during the afternoon when Clark adherents placed in front of the Nebraska a banner inscribed with Mr. Bryan's former eulogistic estimate of the speaker. Mr. Francis said the action of the men handling the banner was an indignity, and expressed the opinion that it would not have happened had he been present.

Allen Up Again.

Wynethville, Va., July 1.—Judge Walter R. Stages came to Wynethville today preparatory to opening Circuit Court tomorrow, when Claude Allen will a second time be placed on trial for his life on an indictment growing out of the court-room tragedy at Hillsville, Va., on March 11 last, when the Aldens killed four court officials and a bystander. The young man already has been convicted on one indictment and given a sentence of five years in the penitentiary. A venire from Washington County has been summoned, the court thinking that it would be impossible to secure a jury from the county.

Chautauqua Successful.

Owensboro, Ky., June 30.—The Owensboro chautauqua, which was opened in Moreland's Park Saturday at noon, is meeting with great success. Former Congressman J. Adam Beale, was the chief attraction today.

Orders Still Come for "The Vulture's Claw."

Olaton, Ky., July 1, 1912.

The Hartford Republican, Hartford, Ky. Gentlemen:

Find enclosed \$1.55 for which send The Republican and Louisville Herald one year and "The Vulture's Claw" to Rev. F. M. Harris, Olaton, Ky., and greatly obliged.

REV. F. M. HARRIS.

Olaton, Ky.

SKETCH OF GOV. WILSON

The Democratic Nominee for President.

Is Native of Virginia—For Many Years College President.

Trenton, N. J., July 2.—Woodrow Wilson, who now becomes the Democratic party's nominee for President of the United States, was born in 1856 in Virginia, where he was baptized under the full name of Thomas Woodrow Wilson. He dropped the Thomas about the time that he completed his first book and took his first position as a teacher.

Mr. Wilson cannot, like many an officeholder, appeal to the sentimentality of the public by an account of a self-made man's rise from poverty. His father and grandfather were educated men, prominent in their communities, and while not rich, were able to give the aspiring young scholar a liberal education. It was not toward scholarship, however, that his earliest ambitions led him. While in college he resolved to become a public man. To that end he studied law and hung out his shingle. But his legal practice was not lucrative, and after eighteen months he gave it up, and with it, for years to come, his desire for office.

His father, the Rev. Joseph Ruggles Wilson, moved to Georgia when the boy was 2 years old, and later preached in various churches in North and South Carolina.

Young Wilson entered Davidson College at the age of 17. After two years he entered Princeton, from which he was graduated in 1878. He then studied law in the University of Virginia, receiving the degree of bachelor of law in 1882. He received the degree of bachelor of philosophy from Johns Hopkins University in 1886, that of doctor of laws from Wake Forest University, North Carolina, in 1887, and that of doctor of literature from Yale University in 1890.

Prof. Wilson occupied the position of adjunct professor of history in Bryn Mawr College, and afterward professor of history and political economy in Wesleyan University. In 1890 he became professor of jurisprudence and political economy at Princeton. In 1895 the title of his chair was changed to that of professor of jurisprudence and upon its endowment he became MacCormick professor of jurisprudence and politics. Prof. Wilson also for several years gave a course of lectures in Johns Hopkins University. He gained fame also as a lecturer and writer. His work entitled "The State" and his "Life of George Washington" are among his best-known writings.

Prof. Wilson became the thirteenth in the roll of presidents at Princeton in 1912, and the first layman to hold this office, all his predecessors having been Presbyterian clergymen. He is, however, a ruling elder in the Second Presbyterian church of Princeton. As a professor he was very popular and his elective classes were always among the largest.

During his administration at Princeton Dr. Wilson made two attempts to change materially the character of American education. In one project he not only failed, but alienated the support of a large body of alumni, of many of the trustees and some of his co-workers on the teaching staff. That project, which did not succeed, was to establish the "tutorial" system for undergraduates. It was resented by the alumni as an attack on the student clubs, and the opposition became so strong that the president was asked by the board of trustees to withdraw his proposal.

The successful innovation was the preceptorial system. That called for the appointment of fifty teachers or preceptors, to be added to the faculty at an increase cost to the university of \$100,000 a year. But the alumni so thoroughly approved the plan that they told the president to go ahead, and assured him that the money for the salaries would be forthcoming.

The plan succeeded and today alumni have furnished the funds. This preceptorial system, by which each student gets the benefit of personal contact with a teacher, is referred to by his admirers as the "tutorial" system.

(Continued on Eighth Page.)

PRISON CELLS OF ANCIENT LONDON

Recently Discovered in Common Lodging House.

Prisoners Carved Their Names on Walls—Massive Bolts Still Hold the Doors.

The authorities of the new London Museum at Kensington Palace have secured possession of some historic prison cells, wherein will be housed the criminal relics of London.

The cells were discovered by a L. C. C. official in a common lodging house in Whitechapel Square, Saint George's-in-the-East, the Chronicle says, and are believed to date back to the time of Charles II. and to have been subsequently used in connection with the Whitechapel Police Court. In the walls, which are built of oak, thickly studded with strong iron bolts, were the original fetters used for the condemned prisoners, together with a plank bed, upon which no doubt many a criminal spent his last night.

The complete cells have been dismantled by experts, acting under instructions from Guy Laking, custodian of the new museum and will be re-erected in their entirety in the annex at the museum, at Kensington, where visitors will be able to pass in and out of them and inspect the many quaint inscriptions on the walls. An old oak staircase still stands in the house in Whitechapel Square, but this will not be removed.

No. 24, where lived Thomas Day, the author of the immortal "Sandford and Merton," is now a mission to the Jews, and where the High Court of the Liberties of the Tower stood a furniture dealer displays his wares.

Rough the corner, in Neptune Street, is a public house, the King's Arms, the proprietor of which has a prison on his premises. Hidden away from the passing throng, unknown, I imagine, to the majority of Londoners, there are the cells and the plank beds, and even of the days when the poor prisoner was poor indeed, the cells in which some of the Penitentiary prisoners pined, and where many a famous felon languished.

He takes his keys, and we pass through a side door into a hall. From the hall a fine old staircase leads to the courtyard, but the cells are below. We pass down a narrow, dark stairway, through a brick kitchen, and across a paved yard, and presently we are in the cells.

Here they are, as they were 200 years ago. The door has to be unlocked with heavy keys, the massive bolts have to be unscrewed, and thick, black, forbidding doors have to be forced back upon their hinges before we can enter the dungeons.

The old prison was known as the Ssly House, because people who were seen to enter it were rarely seen coming out again. There was a subterranean passage that led from the prison to the tower, and to the dock; and it was along this subterranean way that prisoners passed on their way to the guillotine, the famous convict ship.

Standing in one of the cells with its plank bed, the heavy fetters stapled to the wall, the grating of the little window closed, and the candle lighted, we people the dismal dungeon with forms that have long since passed away.

Many of the prisoners founded their names down to posterity by carving them on the woodwork. There the foreign names and Irish names and English names, the inscription is that of Mr. Stockley, the gentleman who had the doubtful honor of being the Inspector of the patch plaster. This was clipped over the month of the victim to prevent him drawing public attention to the fact that he was being executed and robbed.

Another poor prisoner dropped into poetry and carved a significant verse upon the wooden wall:

"The emporium is empty,
To our sorrow;
Let's hope it will
Be full tomorrow."

The fact that our forefather had to put up with dungeon life for being poor is illustrated by the inscription, "Please to remember the poor debtors, 1768."

It is a strange experience to grope your way through these gloomy cells, to come out through a door in which a group of wretched loafers are discussing the free feeding of poor school children, and pass through the sun-shine of the square, with its mission to the Jews, its lodging houses for alien laborers, its modern warehouses and workshops, and a group of fairs absorbed in the latest cricket scores set out in the 120 edition of a half-penny paper.

But over all these things floats a sound that takes one back to the days

when the square was called Marston Square, and the captain and mates lounged about it, while the prisoners of war lay in the dungeons. It is the foot of an ocean-going steamer working up the river to the anchorage in the docks.

The captain has gone—there may, perhaps, be a lighterman and large owner in one of the private houses—and the alien immigrant has brought traces of his own to the once eminently British square—the square in which once stood the Royal Theatre founded by John Palmer, the actor, who fell dead upon the stage after uttering, in the part of "The Stranger," the words, "There is another and a better world."

Big Surprise to Many in Hartford

Local people are surprised at the QUICK results received from simple buckthorn bark, glycerine, etc., as mixed in Afters-Lax, the German appendicitis remedy. Dr. Sanders states that this simple remedy antiseptizes the digestive system and draws off the impurities so thoroughly that a SINGLE DOSE relieves sour stomach, gas on the stomach and constipation INSTANTLY.

Apples in Meade County.

In Meade county, Kentucky, where much land is poor and cheap a farmer said to his wife:

"Which would you rather, for me to take out a life insurance policy for \$1,500, or plant 1,500 apple trees?" She chose the apple orchard. It was set out and the trees grew well but in a few years the farmer died. The next year the orchard came into full bearing and the widow sold the crop of apples for \$1,500 on the trees. For a number of years since the crops of apples have brought her in from \$500 to \$800 per year. The possibilities of apple culture in Meade and Breckinridge counties are greater than Kentucky has, have any idea of. Cultivation, pruning, feeding the land and spraying the trees are needed as much in Kentucky as in Washington, the Ozarks, Virginia or elsewhere, but with proper attention no land will bear. Kentucky is growing apples.—Elizabethtown News.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Halls Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Halls Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: P. J. CHENEY & CO.,
Sold by Druggists, 700. Toledo, O.
Take Halls Family Pills for constipation.

House for Sale in Beaver Dam.

A splendid cottage in the Beaver addition in Beaver Dam, Ky., in good condition, and including four town lots are for sale if sold at once. Residence is now being repaired. A bargain is offered. Call on or address,

BARNETT & FOSTER,
Hartford, Ky.

Finds Cure for Epilepsy After Years of Suffering

"My daughter was afflicted with epileptic fits for three years, the attacks coming every few weeks. We employed several doctors but they did her no good. About a year ago we heard of Dr. Miles' Nervine, and it certainly has proved a blessing to our little girl. She is now apparently cured and is enjoying the best of health. It is over a year since she has had a fit. We cannot speak too highly of Dr. Miles' Nervine."

MRS. FRANK ANDERSON,
Comfrey, Minn.

Thousands of children in the United States who are suffering from attacks of epilepsy are a burden and sorrow to their parents, who would give anything to restore health to the sufferers.

Dr. Miles' Nervine

is one of the best remedies known for this affliction. It has proven beneficial in thousands of cases and those who have used it have the greatest faith in it. It is not a "cure-all," but a reliable remedy for nervous diseases. You need not hesitate to give it a trial.

Sold by all Druggists. If the first bottle fails to benefit your money is returned.

MILES MEDICAL CO., Elkhart, Ind.

SATISFYING THE SWEET TOOTH

A Million Tons of Candy Used Each Year.

Miss America and Brother Will Probably Beat Record This Year.

Think of it! Miss America ate 100,000 tons of candy last year. She will eat as much or more this year. Next year she may beat all previous records. She is the real, original and only "Kinky Kid."

Just now she is eating more than she ever ate before. For Christmas time the candy-eating records must fall. The "female of the species" eats the candy. She keeps the rest of the country busy raising the money where-with to purchase more sweet stuff.

It costs every man, woman and child in the United States just about \$1 a year for chocolates, bonbons, marshmallows, gum drops, all-day suckers and lemon drops. That is, it would cost them that sum if the cost was prorated equally among the 91,000,000 folks in the nation.

In 1910 we ate 2,500,000,000 pounds of candy. It is estimated that most of it was consumed by the feminine sex. And yet, in spite of all this, people wonder why so many American maids and matrons are fat!

Candy factories have doubled in number within the last few years. We are eating fifty times as much of the subtly and funkily sweet stuff as we did twenty years ago. Children must have candy every day, and the children's mothers nibble at it all day long and consume a half-pound box nearly every evening. Strong men have fallen a victim to its insidiousness and sit at their desks furtively gnawing at taffy, fudge and other sticky confections. There are business men who are never without it in their desks. They would as soon think of going without their collars as without their daily ration.

If we would quit eating candy in this country for two years—or just twenty-four hours—we would have saved enough money to pay off the national debt.

With the candy money spent in one year in this country we could buy our Uncle Sammed out new battleships or the dreadnaught type, but we cannot eat warships, and the sweet tooth of America must be filled.

With that \$200,000,000 we could build and fortify, fill up and dig over again another Panama Canal. But we must have our daily ration of candy. If butter does go up to 10 cents a pound and eggs become as precious as the glittering gems from Golconda.

When father was a boy only rich children had candy each day. A nickel's worth of candy would bring a whole schoolroom. That same nickel's worth of candy was a whole Christmas in itself. You had candy to eat only on extra-special occasions like Christmas, the Fourth of July, and during the country fair.

Four times as much candy is now made yearly in the United States as was made ten years ago. The appetite of the "Kinky Kid" is insatiable. Candy shops are thicker now than saloons were in the old days. The output of 1910 was double that of 1906 and was 50 per cent greater than that of 1900.

Watch the children of the public school make a rush for the candy shop during the recess period. Their pennies and nickels come over the counters by the score. Notice, too, how a number of these thrifty youngsters in candies always try to get in the very shadow of these school buildings. They know the number of coins that will be theirs if they manage to get into a food foundation where the sweets will lure the children. The school lunch may cut into their profits, but there is no hope that it will finally break them of the habit.

Chocolates are the most popular of all the variegated, multi-colored wares displayed in the windows of the confectioner. They are getting more so every year. This fondness is going back in the system of the populace. Maroon, gloom, eclairs, weird confections and confessions are holding their own.

Undoubtedly the candy habit is spreading. Candy is more extensively advertised than ever before. Growed folks never think of being ashamed of their candy-eating propensities. Indians down on the reservations eat candy as ravenously as they once ate roast puppie. It is second to watermelon in the opinion of the Ethiopian.

Hundreds and thousands of tons are eaten every day. The market varies but little in the summer and spring months, but it gets a little better along in the holiday season, when everybody feels like he ought to buy

something and finally winds up by purchasing some candy.

Lollipop for the penny trade make up a great part of the candy business in many localities, but it is the box trade, the chocolate that counts most in the grand total. Candy is shipped by the trainload, but the American uses more candy than the mail of any other nation in the world.

Candy is one of the every-day luxuries that keep the people poor. It is a drain that never ceases. Children of all ranks in the social scale buy candies by the penny's worth or the dollar's worth. Plain sugar, some extract of the cocoa bean or some other flavoring, are fused together and straightway this mixture becomes a thing that will coax money from the pockets of millions.

The candy factories buy sugar by the trainload and employ help by the thousands. Machines, however, now do much of the work that was once done by the deft fingers of the candy dipper. The best candies are still hand-made. When you pay 50, 60 or 80 cents a pound for candies, you can gamble that you are getting the pure half-mole goods.

There is not so much profit in the candy business after all, for the competition between manufacturers is keen and the main thing in the trade is to keep the trainloads of goods moving from the steaming pans of the factory into the mouths of the consumers.

Candy is pure enough these days to satisfy the most exacting of the purer reformers. This is especially true of all the sweet stuffs that are supposed to come from one state to another. The national statutes have made this possible, but it took some time to convince the man who makes the candy that the law meant just what it said.—St. Louis Republic.

During the summer months mothers of young children should watch for any unnatural looseness of the bowels. When given prompt attention at this time serious trouble may be avoided. Chamberlain's Colic, Cholera and Diarrhoea Remedy can always be depended upon for sale by all dealers.

The Hog a Sure Thing.

The hog is the farmer's saving bank. It can be mismanaged the same as a bank. He is the glutton of the farm, the savage in the orchard and elsewhere. He is a converter of the by-product of the dairy—butter-milk, separator milk and skimmed milk—into a marketable commodity.

The first question is an important one in the hog business. The hog is really the economic egg on the farm. He can give back for a pound of corn double the pounds of gain that a steer can from a like bushel of corn. While the usual increase of cattle is from 60 to 80 per cent, the hog's increase is 100 per cent. It takes the steer two years to get to market, while the hog is raised in six or eight months.

The hog is a good foundation stone on every farm, and it behooves every farmer to be as well informed as possible, and use the best methods and systems of handling, feeding, protecting and marketing the hog. There are some farmers who have no idea that any old place is good enough quarters for the hogs and all one has to do is to throw the feed into them and let them root it out of the mud or dirt. This is not economical.

The hogs will not do well in filthy places, and there is a likelihood of a loss of one third the feed given them. Give the hog good quarters and good feed, he will be a profitable animal from year to year.—H.N.

If you are a housewife you cannot reasonably hope to be healthy or beautiful by washing dishes, sweeping and doing housework all day, and crawling into bed dead tired at night. You must get out into the open air and sunlight. If you do this every day and keep your stomach and bowels in good order by taking Chamberlain's Tablets when needed, you should become both healthy and beautiful. For sale by all dealers.

Pointed Paragraphs.

Samson was sound asleep when he lost his strength.

The broader the way the swifter the crowd walking in it.

Disappointment is one of the Lord's best pruning knives.

Faith is trust with its coat off and its sleeves rolled up.

The fire and the gold never quite understand each other.

Theology has kept more people out of heaven than it ever put into it.

The wages of sin is death, even if the sinner does pay big pew rent.

"Gray hairs and wrinkles may come, but a happy heart is always young."

The love men have for little she is the same doubtless have for big men.

Love at first sight is a good deal like looking through the wrong end of a telescope.

For soreness of the muscles, whether induced by violent exercise or injury, there is nothing better than Chamberlain's Liniment. This liniment also relieves rheumatic pains. For sale by all dealers.

CASTORIA

THE CENTAUR COMPANY, NEW YORK CITY.

Yellow Jacket Stingers.

Strange how quickly a man will jump off a fence and get on the ground when the plumes seem to frighten him.

That Chicago now-war was worth the price, even if we all were not satisfied. It was an eye-opener and an ear-closer.

The Lords loves a cheerful giver—but it isn't in public libraries along with.

Nobody's flood caused lots of confusion—nothing to what is on first now.

The short and ugly word was worn to a frazzle in that long to be remembered struggle.

Well, well, we all have disappointments—twice over this and "twice to over this."

The California women will vote this fall about sixteen million strong—and it is said that no living man can tell just what to expect.

Frightful Polar Winds.

blow with terrific force at the far north and play havoc with the skin, causing red rough or sore chapped hands and lips, that need Buckle's Arnica Salve to heal them. It makes the skin soft and smooth. Intended for cold-sores, also burns, boils, sores, ulcers, cuts, bruises and piles. Only 25 cents at all druggists.

Grounds for Divorce.

A Cleveland lawyer overworks the telephone to tell us this one:

"A woman came up to my office the other day and wanted to know if she could get a divorce because her husband didn't believe in the Bible. I told her that unless she had something else on him there would be no use to bring suit."

"But he is an absolute infidel!" she insisted.

"That makes no difference," said I. "Isn't it, indeed?" she asked, triumphantly. "Well, you are a fine lawyer, I must say. Here's the laws of Ohio, and they say that infidelity, if proved, is a ground for divorce!"

Children Cry FOR FLETCHER'S CASTORIA

Don'ts For Hubby.

A catalogue of don'ts for husbands, was issued by Mrs. Myra Hartshorn in response to the 10 don'ts for wives, compiled by Rev. Bustard, Rockefeller's pastor.

1. Don't marry a doll and find fault because she is not a helpmate.
2. Don't be afraid of a woman with education and some brains.
3. Don't forget that nine out of ten times your wife wants to be your elum.
4. Don't nag your wife until she loses her temper or goes insane.
5. Don't make the blunder of hollowing that a 4, 5 or six room flat can

supply all of her time, energy and brain power.

6. Don't forget that life without children is a mighty empty sort of existence.

7. Don't refuse to do what you can to lighten the burden of child rearing in your home.

8. Don't forget that you get out of marriage exactly what he put into it.

9. Don't make your purse strings the means of controlling your wife's thought and conduct.

10. If there are no children, don't oppose your wife's taking her place beside you in the work-day world.—E.V.

A Hero in a Lighthouse.

Five years J. S. Donahoe, 50, Haver, Mich., a civil-war captain, as a light-house keeper, worked awful weeks, but a queer fact is, he might have been a wreck, himself. If Electric Bitters had not prevented, "They cured me of kidney trouble and edema," he writes, "before I had taken other so-called cures for years without benefit and they also improved my sight. Now, at seventy, I am feeling fine." For dyspepsia, indigestion, stomach, liver and kidney troubles, they're without equal. Try them. Only gets at all druggists.

Most people slip up on their own smoothness.

The greatest sorrows are the ones we never reach.

The plans for tomorrow are the ones that slither fatness on.

Many a man would be like Job if he did not cost so much.

We would all live in a fool's paradise but for life's bitter blows.

Many a preacher smoothes the truth in his attempt to protect it.

Most men like to let their light shine when they get a new car.

Good advice is seldom taken away as it is given in practical doses.

No man gets any higher a character than he wishes all others to be.

Some think they are saints because their neighbors would be relieved to have them go to glory.

More Cows Needed.

During the last thirty-five years the population of the United States has doubled, and it is estimated that the number of dairy cows has also doubled—increasing from less than 11,000,000 to more than 22,000,000. In the face of this increase cows have increased in value per head about 60%. It is also estimated by statisticians that the population will again double in the next thirty-two years and that if people are to have the same amount of butter and milk the number of dairy cows must be again doubled. This means that the Central West will gradually increase in dairying, and if it continues to supply its percentage of meat products we must grow more and more to the acre. Whether we come to smaller farms or not, one thing is sure, we must grow more to the acre.

Buy it now. Chamberlain's Colic, Cholera and Diarrhoea Remedy is almost certain to be needed before the summer is over. Buy it now and be prepared for such an emergency. For sale by all dealers.

FRIDAY, JULY 5.

Hartford will boom with the oil boom.

Will "Marse Henry" jump in the race some more?

Ohio County Clark men hoped on until the very last.

While dodging the steam roller, look out for the auto coming from the other side.

Mr. Bryan is the greatest Democrat of our day—even greater than the nominee.

Omie James did get to be Chairman of something, and didn't have to nominate himself either.

All things come to those who wait. So we have been told, and the discovery of oil at Hartford is convincing.

Lynching having been introduced into Mexico, it is presumed the barbarous sport of bull fighting will be abandoned.

A woman at Birmingham has been sent to prison for beating her husband. This is the sort of "equal rights" we favor.

During the hot times at the Baltimore Convention, when fist fights were common our Democratic brethren had our heartfelt sympathy.

Is this Parker who was elected temporary chairman at Baltimore, the same Parker whose morning plunge for a swim daily recorded and served up to the reading public about eight years ago from "Esopus"?

In Wilson and Marshall the Democrats have probably done the best possible in the way of a ticket, but there is much bitterness among Bryan upon the part of the Clark followers as a result of the convention work, and it is sure that the moneyed interests will not support Wilson to any extent. If the Republicans could have agreed on Hadley at Chicago, it would be a better race.

"Mr. J. P. Whittinghill, an erstwhile special revenue agent of the State of Tennessee, Ky., has come out as a Republican candidate for Congress in this district to oppose Congressman Ben Johnson, who will have no other opposition. Mr. Whittinghill is known as a Taft follower, but he will probably not be able to use any of the notorious Chicago methods in his race."—Hartford Herald.

On the contrary Mr. Whittinghill was a strong advocate of the nomination of Col. Roosevelt. Wonder where the Herald got its information, or more correctly speaking "misinformation".

I. C. DISCRIMINATION.

Kentucky newspapers were cut from transportation in return for advertising. The first of the year, but it is known that this road is supplying horses to all State and County officers who will accept them. For years the newspapers of the State have furnished this real valuable space in which to exploit itself, but all this is forgotten. The papers are furnished to officials free. The newspapers paid for them in advertising. The question is what does it expect from the officials. This is one for the people to look into.

WILL TAFT DECLINE.

A report is being circulated to the effect that strong pressure is being brought to bear upon President Taft to induce him to decline the nomination. In view of the storm of disapproval which the Chicago convention has met, it is agreed that he might very gracefully back out by saying that the legality of the convention had been questioned and that he would not accept a tainted title. Nothing he could do would have so much effect to give him a respectable place in history as an honest President, if he accepts nothing and disingenuous defeat awaits him. Republicans in every State from which he must get his electoral vote are in open revolt against him and no one now doubts the open drift of delegates necessary to give him the nomination. Will Mr. Taft yet place himself right with the Republicans of the United States, or will it be necessary to organize a new party and leave the

old organization in the hands of狡猾的 Barnes, Penrose, Root, Crane and Co., with a more doubtful of spies?

PROTECTION THE ONLY SAFE GUIDE.

The importers of sugar, a combination of wholesale grocers using included in that array, is making a great struggle to have the duty on refined sugar taken off as completely as it has been reduced on raw sugar.

There was a time when the only sugar produced in our country was the cane sugar in Louisiana, but in the last 20 years the development of the beet sugar industry has become so great as to have, in addition to the cane sugar product, enabled the country to produce nearly half its entire sugar consumption, and during the same period the per capita use of sugar has increased until it is higher now than that of any other country. It is not natural that the beet sugar men, both the manufacturer and the grower, should join hands with the cane sugar men and between them it is almost impossible for the layman to know just where he is at.

The only clear and safe guide is the principle of Protection to our own industry. Hawaii is included in the continent, so that there is Free-Trade between her ports and ours and Hawaiian sugar comes free of duty in great quantities and still there has to be imported several hundred thousand tons of sugar from other countries, notably from Cuba and from Germany. Even Cuba has had 20 per cent. drawback or reduction from the regular duty under treaty arrangement, and still we have to import from other countries in very large quantities.

Sugar producers of our own lands say that within no distant period they will be able under Protection to supply the domestic market entirely and make it independent of all foreign production, and as things go, this is an object worth striving to attain.

Sugar in America is about as cheap as it is anywhere else in the world, even now, but the records show that the reduction from an unreasonable figure, a few years ago, to a lower one makes a reduction in price of sugar to the consumer to the extent of two cents a pound.

If it can be shown that there is safety in a further reduction either of duty on refined sugar or in the wholly free admission of raw sugar, Congress should take steps at once to adjust the conditions of import so that the consumer shall have whatever benefit he can justly derive and the producer of sugar also have that Protection to which he is entitled.

Miss Bennett Entertained.

Miss Dora Bennett, of Route 2, Hartford, entertained a few of her friends last Wednesday night in honor of her fifteenth birthday. Those present were: Misses Gerlie Bennett, Leahy Ward, Basille Davis, Lena Young and Dora Bennett. Messrs. Erben King, Cherry Wallace, Geoffrey Bennett, Claude Moxley, Clarence Renfrow, Auburn Tichenor and Clarence Ward, and Mr. Morton King, wife little daughter, Edith Bell; Mr. Herbert Shown, wife and child, Edith Ford; Mr. Herbert Westerfield, wife and daughter, Marie; and Mr. and Mrs. James Ventres. All spent an enjoyable evening.

BEAVER DAM

Governor M. H. Thatcher, of Panama, spent a few hours visiting friends in town Sunday.

Miss Myrl Miller went to Princeton Sunday to visit her aunt, Mrs. Fred Taylor.

Miss Orpha Stevens went to Owensboro Wednesday.

Messrs. Verda and Clara Lloyd went to Owensboro Thursday.

Mr. Warden Gamble will go to Princeton Saturday.

Miss Anna Deane entertained at noon Tuesday evening.

Mrs. Ben Thomas is ill of typhoid fever. She is seventy-three years old.

Mr. Marshall Barnes went to Louisville Wednesday.

Mr. B. O. Stevens, of El Paso, Tex., is visiting his father, uncle Dick Stevens.

Mr. J. P. Barnard, of Louisville was in town this week looking after his mine.

Mr. C. E. Frazer, formerly with the Broadway Coal Co., has accepted a position with the Taylor Coal Co.

Miss Grace Shultz, of the Penick neighborhood, was in town Wednesday visiting Mrs. T. S. Gentry.

The W. O. W., unveiled the monument at Sunny Side cemetery Sunday. The services were attended by a very large crowd.

Entertained.

The Messrs. Lambert entertained quite a number of their friends at their home near Friedland, in honor of their friend, Miss Lulu Hardin, of Point Pleasant, who has been visiting them for the past week. Those present were: Messrs. Lulu Hardin, Mona May, Orr Perry, Mary, Ida and Myrtle Lambert; Messrs. Beulah Wilkings, Alvin, Sayle and Mont Perry, Dave and Art Lambert, and William Coy. Those present enjoyed a pleasant time.

To Breeders and Shippers of Sheep!

The Government requires that each load of sheep shipped from Ohio county be accompanied by a certificate stating the number of sheep, to whom they are being shipped, and the market upon which they are to be sold. No sheep can be brought into this county from an adjoining county, without a certificate from the inspector of the county from which the sheep originate. Shippers of sheep living in this county and buying sheep in adjoining counties; must secure a certificate from the county inspector in the county where the sheep are bought and mail same to me before I will issue a certificate for for sold sheep to be loaded in Ohio county to be shipped to market.

Farmers living in Ohio county are required to secure a certificate before they can sell and move shees from this county to an adjoining county are hereby warned not to move any sheep without a certificate.

Shippers and farmers should write me at least two days before they desire to ship or move sheep to another county; stating the exact number of sheep to be shipped or moved, to whom they will be shipped, where they are to be sold, over what railroad they will be shipped and the date they expect to ship.

Shippers waiting until the day they expect to ship or failing to state the number of sheep in applying for certificate will have sheep left at shipping point until said requirements are fulfilled.

For certificates or further information, address:

L. D. BENNETT, Inspector,

Hartford, Ky., R. F. D. 3

OIL BOOM HITS HARTFORD FOR CERTAIN

Eighth Flow Discovered Monday
Afternoon on the Carter
Farm.

The citizens of Hartford were amazed Tuesday morning when it was announced that another fine flow of oil had been discovered in the well of the West Kentucky Oil Co., on the Carter farm above this city. The flow was found late Monday afternoon at a depth of 180 feet and is the eighth flow of oil found in this well.

Some weeks ago the well was "plugged" with ultra-glycerine, but the management was not contented with this oil, believing that at a greater depth better and more valuable oil would be found. Since that time the crew has been working constantly, and Monday their efforts were realized in the discovery of the famous Trenton rock, in which is always found the very best oil. Oil experts say that wherever Trenton rock is found, there also will be found oil that will test almost as high as the Pennsylvania oil.

The well now stands full of fine oil and operations have been suspended until the arrival of piping, which will be used in drawing the oil out of the well into large tanks that have been erected. A conservative estimate of the capacity of this well alone is said to be not less than 20 barrels per day, with probably an increase to 500 barrels per day. Experts say that oil is graded as to gravity, the figures standing from 16 to 25, the latter number being the very best oil, while the former figure being the most inferior grade. The oil here has been analyzed and shows 16 gravity, which is much encouragement to those concerned.

Congratulations are due to the West Kentucky Oil Company upon their good fortune for they merit such on account of their untiring perseverance in giving this enterprise a thorough test.

Prepares Annual Statement.

In another column in this issue of The Republican appears the annual statement of the Bank of Hartford at the close of business on June 30. This bank has a capital stock of \$25,000, is conservatively managed, and by reading its statement, proves conclusively that the people have confidence in the solidity of the bank and its management.

OLATON.

Messrs. Kathleen and Gannett Mary Young, of Fordsville, spent several days the guest of Miss May Hyatt, at Philadelphia, and attended the Methodist revival here.

Mrs. Wesley D. Duke and his daughter, Miss Jesse, are at the bedside of Mrs. Duke's brother, Mr. Howell, at Clinton Mills, Ky.

Mr. Edward C. Taylor, the portrait man, of Mt. Washington, Ky., who has been delivering lectures at White Run and Spring Lick, was down Sunday to attend the all-day service at the Methodist church.

Messrs. Mercedes and Myrtle Chaney were here from Sulphur Springs to spend the Sabbath.

Miss Maude May Miller spent several days at Horton.

Miss Helen Felix was here from Fordsville and spent several days with friends and relatives.

Mr. Willie P. Davidson, of Glasgow, spent Sunday the guest of his friend,

Wilbert E. Hall.

Mrs. Minnie Wilson has returned home to Yeamon after spending a week the guest of her parents, Mr. and Mrs. Young.

Mr. Payton and family arrived from Beaver Dam, Tuesday to be the guest of relatives here.

A mule belonging to Mr. Joseph M. Miller was killed by the early Sunday morning train.

Dunk Hall was at Reynolds, Ky., the guest of his parents several days.

Mr. White, of Dounfield was the guest of Mr. Cotton and family near town Saturday and Sunday.

Miss Stella David will give an expression recital at the Rockport City Hall, at Rockport, Ky., Saturday evening July 13th, 8:30 o'clock.

The Olaton picnic will be given by the beautiful Patterson grove, July 12th, with A. L. and W. C. Patterson as managers.

Mr. Jim Hall, of McGrady, was in Tuesday, the guest of his mother, Mrs. M. Hall, who has been on the sick list the past several days.

The revival closed at the M. E. church on Monday night. Bro. Christy Gentry left Tuesday to begin a meeting at Union church, near J. B. York's store, Olaton, Route 1.

Rev. and Mrs. Tolbert and daughter, Florence, left Wednesday to begin a revival at Fordsville, Grayson Co.

Bro. Crowe returned home Monday after a visit to Fordsville and a short stay the guest of friends.

Miss Anna Bennett and Mr. Alvin Gentry, of Harrods Ferry spent Sunday in Olaton and attended the revival.

Mr. C. L. Moxley, of Tristler, was a pleasant visitor in Olaton recently.

Miss Marie Douglas is the guest of relatives in Hartford.

Mr. and Mrs. John F. Allen were in Fordsville Tuesday.

There was an all-day service at the Methodist church Sunday and dinner in the Patterson grove at noon. One of the largest crowds ever seen in Olaton was here that day, and the day was pleasantly and profitably spent, good dinner on the grounds, and but for the downpour of rain about the noon hour the day would have been an ideal one.

FORDSVILLE.

Miss Angus Lynn is visiting friends and relatives in Burlington.

Miss Mary Thomas Quisenberry left yesterday to visit in Irvington.

Mr. and Mrs. J. H. Loyd, Miss Ruth Loyd, Miss Ismay Mason and Miss Grace Whittinghill are attending Summer Normal School at Bowling Green, Ky.

Messrs. Edith and Helen Wilson and brother, Master Gordon are visiting their aunt, Mrs. Vera Jachor, of Harrodsburg.

Mr. and Mrs. Frank K. Mosely, of Owensboro, will spend the Fourth with Mrs. J. S. Mason.

Messrs. Kathleen and Gannett Young are visiting Miss May Hyatt, of Olaton.

Mr. and Mrs. C. P. Gauden are making a two weeks visit to their sons, Mr. C. B. Gauden and Mr. Willie Gauden.

Mrs. Clarence Keown is on the sick list this week.

Mrs. "Magg" Smith, who has been quite ill for several weeks, is improving.

Miss Anna Cooper is visiting in the country near here.

Miss Abbie Beard and her daughter, Pauline, are visiting friends and relatives near here.

Mr. and Mrs. Mabel Wilson, of Louisville, arrived Tuesday afternoon to spend the Fourth with their son, Dr. Claude Wilson.

Miss Ismay Mason attended the N. B. A. in Louisville last week.

Yellow Jacket Stingers.

The way to keep business going this summer is to keep plenty of good ice. Publicans in power, promote prevention, spells disaster.

We have always regarded that a thief is a thief whether he steals a vote or a horse. What do you think about it, Hiram?

The people usually know what they want, but the trouble is the bosses don't see that they do and hence the government that is kicked up.

It seems that the dear girls are divided into two classes—those who are dying to get fat and those who are crazy to get thin.

Indeed it is true that the man who sows to the wind reaps the whirlwind. It was sown and has been reaped and will be always so.

Chung, Clark defends the summer lecture. "I've course. That's what Chung got the four thousand people he dropped in Hampton's magazine."

The London suffragettes who got arrested because in prison will have plenty of time to figure it out when it they don't get out.

The Chicago convention furnished proof conclusively that while civilization has made some headway we are yet a long ways from being civilized.

Toddy could not show all his strength because the primary cause wasn't analyzed. But wherever he got a chance for a direct response the people could

truly ordered him. This is a fact we print in order to keep history straight.

The Yellow Jacket will now adjust its stings and do business at the oil stand in the language of immortals, all in glory, now is the time to see, see, see, and have your neighbors see, see, see, get the juice as it runs.

An exchange wants to know what has become of the old-fashioned boy who had behind his mothers skirts. We suppose he got a glimpse of a peach down or umbrella cover garment and disappeared.

Joe Wiley is the father of a boy boy and turned down a job offered him in Boston because he couldn't see the whole show, and the salary was \$100 a year. Stinks as that Joe could have afforded to lose the job on a man like that. With help some other fellow might have stood for part of the losing.

They have employed some athletes to test out Harry Thaw's muscle machine once again. One athlete says Harry is "constitutional inferior" and the other says he is sane. And then you are. It is wonderful how much wisdom these thinking athletes have showed under their hats and it would also be wonderful to see the way that they get to give their brains of wisdom down.

A cow belonging to the Federal penitentiary at Atlanta got out the other day and raised a man's garden and did about fifty cents damage to the truck and the great American Congress took up the case and spent over an hour wrangling about whether it should be paid or not. Haven't we a wonderful Congress to be spending valuable time feeding over such trifling business as that?—From The Yellow Jacket, Moravian Lodge, N. C.

One Week of Fun!

MARVELOUS GROWTH OF THE SOUTH

Population Increased Over 77 per Cent.

Agricultural and Manufacturing Interests Exceed Those of Thirty Years Ago.

Life statistics of growth in the south show that the improvement going on in that part of the country for many years still continues. This growth is not only agricultural, but to a far larger extent manufacturing. Thirty years ago agriculture in the south produced by quite \$20,000,000 annually. The change which soon set in had been so great in 1890 that these conditions were more than reversed—that is, the manufactures, including the products of mines, then exceeded the agricultural products by \$20,000,000.

Recently were printed in The Manufacturers Record the latest statistics pertaining to southern growth. Dealing with bank deposits, the statement was made that in 1860 the total in all the national banks in the south was only \$23,425,023, the total for the entire United States being then \$77,377,677. Today, thirty-two years later, the deposits in the national banks of the south alone amount to \$367,423,510, or \$33,800,000 more than the deposits in the national banks of the whole country thirty-two years ago. The other banks of the south show a similar phenomenal growth. In the state savings, and private banks, loan and trust companies, in 1860, the deposits were only \$117,400,491, whereas now they aggregate \$1,884,005,510. Other statistics compiled for the same publication, as summarized in the New York Evening Post, contain the following items:

"Since 1860 the population of the south has increased 77 per cent, but in the same time its individual deposits in national banks have increased 1,300 per cent and deposits in other financial institutions 28 per cent. In the same period it has increased its capital invested in manufacturing 500 per cent, its capital in cotton mills 1,300 per cent, its capital in cottonseed oil mills 2,400 per cent, and its expenditures for public education 25 per cent.

"In 1860 the south expended on its common schools \$12,411,000, last year it expended for the same purpose \$18,000,000. This very great increase in common school expenditures has not been due to any spasmodic growth of the last few years, but to a steady, gradual expansion of school expenditures from the very day when the south emerged from the poverty and degradation of the war. It is an interesting fact that the south is now expending almost exactly the same amount of money upon common school education as the entire country expended in 1860.

"The production of coal in the south last year was 15,000,000 tons, as compared with a total for the United States in 1860 of 71,481,000 tons. The south's production of petroleum last year was \$6,000,000 barrels, as compared with 25,000,000 barrels for the United States in 1860.

"In 1860 there were in the United States 10,633,300 spindles operating in cotton mills, most of these being in the north. At the present time the south has 11,336,000 cotton spindles."

CASTORIA

For Infants and Children.
The Kind You Have Always Bought

Bears the Signature of J. C. Watson

Let Kids Ask Questions.

There is a good deal of truth in the old quotation, "Let me train a child till it is 8 years old, and I care not who has his training afterward." Most of the habits that are to rule its life being formed by that time.

Children showing a particular bent in any direction should be encouraged whether it be skating, reading, drawing or something else. If the child has a propensity for asking questions, it should also be encouraged by answering its questions as well as circumstances will allow. It is a faulty teaching method to tell a child that it asks too many questions.

Grown-ups, instead of trying to keep children quiet, should learn to sleep by the aid of the noise and not in spite of it, and they should always vote for school committee members who advocate the smallest possible classes in school.

Children should never be frightened into being good by telling them they will be turned over to the mercies of a bear, a boy man or the doctor. The practice sometimes destroys a child's belief in respect for parent or guardian.

Children's lies should not be regarded too seriously, as they often speak merely from vivid imagination. Severe pun-

ishment should seldom be given for fibs, but rather gentle admonition, otherwise the child will aim not to get found out in its lying rather than to avoid lying itself. Above all, to make truthful children parents should set a good example themselves.

Even the stealing of money is not a heinous offense, and can usually be cured by gentle reprimand and argument. Formulas for politeness should be avoided. Politeness should always be based on good-will. If it is based on insincerity it is of no value.

As to children being "seen and not heard," they should be heard as much as possible, save on rare occasions of great seriousness, and the general conversation when children are present should be on subjects interesting to children.—Dr. E. P. Putnam, in the Journal of Education.

A Girl's Wild Midnight Ride.
To warn people of a fearful forest fire in the Catskills a young girl rode horseback at midnight and saved many lives. Her deed was glorious but lives are often saved by Dr. King's New Discovery in curing lung trouble, coughs and colds, which might have ended in consumption or pneumonia. "It cured me of a dreadful cough and lung disease," writes W. H. Patterson, Wellington, Tex. "After four in our family had died with consumption, and I gained 87 pounds." Nothing as sure and safe for all throat and lung troubles, Price 50c and \$1.00 Trial bottle free. Guaranteed by all druggists.

What Protection Means.

Especially should wage-earners in our factories and farms be interested in the maintenance of tariff schedules at a point where our own well-paid workmen are not brought into competition with the cheap labor of Europe.

When our manufacturers are operated at full capacity, and their employees enjoy liberal weekly compensation, the farmer is proportionately prosperous.

He is prosperous because workmen are earning wages that enable them to live well, and they are paying outcrop of the men who till the soil.

Today apples are nearly as high in price as potatoes, yet we remember when Cleveland was President, in 1896, a disgruntled farmer ordered a basket of apples in front yard of a Trenton citizen and told him they were a gift, because he was unable to sell them.

The reason for this was that the workmen of Trenton were ill-paid and those fortunate enough to get employment were obliged to work for small wages, because the American market was bulging with the products of cheap European labor.—Trenton Gazette, May 12.

Afraid of a Buggy Top.

Col. Gano Johnson, of Mt. Sterling, whose reputation as a student and exponent of scientific principles of horse breeding, is country-wide, looks further into this subject often than the scientists themselves. A party described a young filly once, in his presence as bred in such a way. After a moment's thought Col. Johnson said, "She will grow up to be afraid of a buggy top or a raised umbrella." This proved to be the case to such an extent as to unfetter her for road purposes. It was simply a knowledge of this characteristic existing in the 1st, 2nd and 3rd dams that occasioned the prediction. Col. Johnson avows to have made a study not only of pedigree but of bad as well as good traits. In breeding one, he says, we may unwittingly introduce another—in fact, he thinks often breeders think neutralize their efforts at improvement. The question comes up, "How are we to avoid it? If it already occurs in three dams, when the dam counts, as he claims, seventy per cent in influencing the character of the foal? Perhaps there is no way to eliminate a fault so firmly fixed short of taking the dam out of breed mares. But such a sacrifice not many breeders will make, and so defects are handed down—the one cited being only one, and not, by any means, the greatest. There are blindness, and thick skull, splints, bone spavin, etc., to be reckoned with. If possible the dams should be free one or two generations back from all these and other hereditary diseases, or undesirable habits.

But if you charge up every equine fault or frailty to the blood mare and discard her there would not be enough of them left to supply the wants of the country.—Farmers Home Journal.

Emerson on "Compensation."

All things are double, one against another—till for fast; an eye for an eye; tooth for a tooth; blood for blood; measure for measure; love for love. Give and it shall be given you. He that watereth shall be watered himself. What will you have? quoth God; pay for it and take it. Nothing ventures nothing have. Thou shalt be paid exactly for what thou has done, no more, no less. Who doth not work shall not eat. Harm watch, harm catch. Curses always recoil upon the head of him who imprecates them. If you put a chain around the neck of a slave, the other end fastens itself around your own.

For Sale.

EARLY DAYS OF BASEBALL

Used to Play Without Gloves and Masks.

Fractured Noses and Broken Fingers Were Everyday Incidents.

"Can you imagine a modern baseball team playing the game barehanded?" asked a gray haired fan while discussing diamond doings of long ago. "There would be plenty of business for the bone setters and so many errors in the field that the sport would develop into a burlesque. Yet I can remember the days when ball players never wore gloves and when catchers had neither masks nor mitts. It required great courage to face a swift pitcher and lots of nerve to get in front of a hot grounder."

Many of our citizens who played baseball more than thirty-five years ago will tell you that broken fingers, bone bruises, split palms and torn finger nails were everyday accidents and that a player who showed the white feather was tabooed. Before gloves and masks were invented catchers had endless troubles. The old timers who dared to stand close behind the batsmen had teeth knocked out and noses fractured by the foul tips that could not be avoided. Soon came a habit of putting a piece of solid rubber in the mouth made in such a manner that it covered the lips and provided protection for the teeth. It proved so efficient that all the leading catchers adopted it. But even then it was dangerous to catch close up until James T. Tynge, the former Harvard player, invented the mask, a cumbersome affair with broad strips of flattened iron that covered the face, but also partially obscured the catcher's vision.

Then came the catcher's gloves, one for each hand. These gloves were of light aid with no fingers and little or no padding. Catchers who handled swift deliveries, therefore, soon found that the gloves did not come up to the requirements, so it was a common thing to see backstops stuffing grass into the gloves to protect the palms of the hands.

One of the first National league catchers to use a left hand glove with fingers was Meyers of Indianapolis, more than twenty-five years ago. Somebody made a glove for him that caused a general laugh. The fingers were so long and the surface of the glove was so broad that Meyers found it difficult at first to hold a pitched ball. He was catching the great Henry Hoyle in those days, and Hoyle had lightning speed. Meyers had broken all of his fingers, also both thumbs, in handling Hoyle with the fingerless gloves, so that he readily tried the new one, and after much perseverance he proved that it had merit. After that all the catchers adopted a finger glove for the left hand. The glove was improved upon when the manufacturer put solid leather tips on the ends of the fingers to protect the nails.

Back Ewing, Silver Flint and Charley Bennett, three of the greatest backstops the game ever produced, were among the first to adopt the mitt, which was a comparatively light affair, but made it impossible to injure the fingers of the left hand. As the manufacturers gradually increased the size and weight of the catcher's mitt the mania for gloves became general. The in and out fiddlers adopted them, some using the mitt until the baseball role markers were forced to legislate against the practice.

When the rule stipulating the size of the glove to be worn was passed the catcher was allowed to wear the same heavy mitt, while a lighter one was assigned to the first baseman. But all the other fiddlers were compelled to use a finger glove weighing not more than half a dozen ounces. Before the in and out fiddlers began to wear gloves, however, many stars made remarkable records. Adrain C. Anson played first base for Chicago for many years barehanded. The old man was a mark for such swift throwing infielders as Ed Williamson and Fred Pfeffer, who tried in vain to make him wince. Many times Anson went home from the ball field with swollen fingers and very painful bone bruises, but never used a mitt or a glove until near the end of his diamond career.

With the popularity of the glove came an improved style of mask. The wires were made smaller and stronger, with the padding firmer. Later on the mask had a visor of leather to keep the sun out of the catcher's eyes, together with a steel protection for the neck and throat. The chest protector came into use in the eighties, but at first it was not inflated. It was a flat affair with a bamboo frame over which

was a buckskin covering. This did not prevent catchers from being partially knocked out by sharp foul tips in the lower basket, so the pneumatic chest protector was hailed with delight and is now indispensable.

Roger Bresnahan was the first major league catcher to wear shin guards such as cricketers use. He was ridiculed at first, but when a special make was put on the market Roger was vindicated. The guards now worn by many backstops have a joint at the knees so that they do not impede catchers in their hurry after foul flies. The guards are adjusted quickly and prevent many serious injuries.—New York Sun.

What Will the Poor Girls Do?

A Texas editor bemoans that: "What will the poor girls do? Scientists have discovered that dancing makes the feet large, ice cream produces freckles, hanging on the front gate causes rheumatism, tight lacing invites appendicitis, too much pressure around the waist produces heart disease, and kisses are full of microbes. This is indeed a sad situation for any part of humanity to be in, and we deeply sympathize with the young ladies in their affliction, but we do not believe that whatever the consequences, the girls will abolish the pleasures of dancing, neither will they forbid themselves to eat ice cream because it will cause freckles. Freckles are becoming anyway. And anybody with freckles had just as well have big feet as not. Tight lacing may invite appendicitis, but in the modern time, such an insignificant thing as an appendix can be removed in a short time, and cause no further thought. There is no need at all of hanging on the front gate and the girls know it. There is a piece on which you can sit down and be as comfortable as a king, and be protected from the ghosts that travel around in the night. But these last two are the easier to dispose of than any of the others. Just find some good looking young man, give him your heart, and you cannot have heart trouble; then when you have no heart, how can microbes hurt you. Kiss them, all you please, it can't hurt you then. It takes more than a Texas editor anyway, to get ahead of a bunch of American girls.

Dysentery is always serious and often dangerous disease, but it can be cured. Chamberlain's Colic, Cholera and Diarrhoea Remedy has cured it even when malignant and epidemic. For sale by All Dealers.

Sheriff's Sale.

By Virtue of Execution No. 523 Book 12, directed to me, which issued from the Clerk's Office of the Ohio Circuit Court, in favor of S. A. Anderson against V. L. Anderson and Mary A. Anderson his wife, I, or one of my deputies, will, on Monday the 1st day of July, 1912, between the hours of 1 o'clock p. m., and 4 o'clock p. m., at the Court House door in Hartford Ohio County, Kentucky expose to Public Sale, to the highest bidder, the following property (or so much thereof as may be necessary to satisfy Plaintiff's debt, interest and costs), to-wit:

Beginning at a stone at the east side of the Hartford & Rockport Road, being D. C. Maddox's S. W. Corner, also thence with the meanderings of the said road as follows: S. 4 W. 5.28 Chains; thence S. 2 W. 4.57 Chains; thence S. 17 1-2 W. 6.50 Chains; thence S. 12 W. 35 Chains to a stone in C. P. Moseley's (Pet Renter); thence S. 40 E. 24.11 Chains with said Moseley line to a hickory, the same being the W. T. Ashby corner also; thence N. 20 E. 22.72 chains to a stone at D. C. Maddox S. E. Corner; thence S. 83 1-2 W. 22.01 chains with said Maddox line to the beginning containing 43.31 acres, conveyed to Mary A. Anderson and V. L. Anderson (her husband) by J. E. Maddox, recorded in the Ohio County Clerk's office, deed book N 31, page 370. Also another tract of land lying in Ohio County, Kentucky and bounded as follows: Beginning at a stone in the Hartford & Rockport road, being corner to J. E. and Verda Maddox land, running south 1 degree, W. 5.81 chains to a stone in said public road being J. C. Duvall's corner; thence N. 85 degrees W. 25.74 chains to a stone in Harve Brown's line, being J. C. Duvall's corner; thence N. 8 degrees W. 5.98 chains to a stone in Haney Brown's line, being J. E. and Verda Maddox corner; thence S. 83 E. 26.64 chains to the beginning, containing 15 acres more or less. Conveyed to Mary Anderson, by J. E. Maddox, deed day of _____ and recorded in deed book No. 34 page 368 and 370 in the office of the clerk of Ohio County Court; all of which remains in my hand unsold; and all of which is held subject to a mortgage held by Heavrin & Woodward in the sum of \$60.00.

Levied upon as the property of V. L. Anderson and Mary A. Anderson, his wife.

TERMS: Sale will be made on a credit of 3 months, bond with approved security required, bearing interest at the rate of 6 per cent. per annum from day of sale, and having the force and effect of a sale bond.

Witness my hand, this 13th day of June, 1912.
T. H. BLACK, S. O. C.

Are You Blue and Worried?

Nervous? Some of the time really ill? Catch cold easily and frequently suffer from biliousness or headache? The reason is that your system does not rid itself of the poisons in the blood; just as impossible as it is for the grate of a stove to rid itself of cinders. The waste does to us exactly what the cinders do to the stove; make the fires burn low until enough cinders have accumulated and then prevent its burning at all. Your liver is sluggish—you are dull and heavy—sleep does not rest, nor is food appetizing. In this condition illness develops. Doctor Pierce's Golden Medical Discovery eradicates the poisons from the body—a glyceric alterative extract made from bloodroot, golden seal and mandrake root, stone and queen's root, without the use of alcohol. No matter how strong the constitution the stomach is apt to be "out of kilter" at times; in consequence the blood is disordered, for the stomach is the laboratory for the constant manufacture of blood.

Mrs. B. B. Black

Mrs. B. B. Black, of Port Dover, Ont., Nov. 26, writes: "I have been a great sufferer for years from throat trouble, catarrh, indigestion, female troubles, bloating, constipation and nervousness—at times I would be in bed, then able to be up again. Was under many different doctors' care, and would get better for a little while, then I would go down with chronic inflammation all through me. For nineteen years I had this poison in my blood. After trying nearly everything I got worse. I read in The People's Common Sense Medical Adviser of Dr. Pierce's Golden Medical Discovery and Dr. Sage's Catarrh Remedy. I have taken the Golden Medical Discovery and Pleasant Pellets, and have used five bottles of Dr. Sage's Catarrh Remedy. I am now able to do my work and walk with pleasure. I feel like a new woman. I enjoy everything around me and thank God for letting me live long enough to find something that made me well again."

Dr. Pierce's Pleasant Pellets regulate liver and bowels.

Stubborn Case

"I was under the treatment of two doctors," writes Mrs. R. L. Phillips, of Indian Valley, Va., "and they pronounced my case a very stubborn one, of womanly weakness. I was not able to sit up, when I commenced to take Cardui.

I used it about one week, before I saw much change. Now, the severe pain, that had been in my side for years, has gone, and I don't suffer at all. I am feeling better than in a long time, and cannot speak too highly of Cardui."

TAKE The CARDUI Woman's Tonic

If you are one of those ailing women who suffer from any of the troubles so common to women.

Cardui is a builder of womanly strength. Composed of purely vegetable ingredients, it acts quickly on the womanly system, building up womanly strength, toning up the womanly nerves, and regulating the womanly system. Cardui has been in successful use for more than 50 years. Thousands of ladies have written to tell of the benefit they received from it. Try it for your troubles. Begin today.

Write to: Ladies' Advisory Dept., Cardui Medicine Co., Centertown, Ky. for Special Attention, and 64-page Book.

PROFIT-SHARING SALE!

BEGINS JULY 13--CLOSES JULY 27

To Share in the Profits you must pay Cash or Produce Checks for your Purchases. Merchandise Charged at Regular Prices.

OUR SEMI-ANNUAL SELLING EVENT

That many have already been asking about and many more are waiting for will, if possible, be more attractive from a money saving standpoint than ever before. We can't blame you for waiting for this great sale. We know better than you do its money saving power. We know how hard we work to buy good goods cheap in order to be able to sell them cheap to our customers. We leave it to you how well we have succeeded. For two weeks we are going to share the profits with our customers and many odd lots of merchandise we will actually accept a loss to get them into the hands of the consumers.

Thousands of yards of good staple every day merchandise have been bought by us, so we can sell them to you at what we ordinarily have to pay the manufacturers for same. These two weeks of fast selling means a big saving to those who take advantage of our profit sharing prices.

Nothing Reserved. Every Item Receives a 10 Per Cent. Cut.

Make your arrangements to be at this store on July 13th. See the good things we are offering and you won't be able to get away without an arm load of goods. Below we give you a few quotations from several of our different departments, which is only an index to the enormous spread that awaits you here. **COME EVERY DAY.** You can't begin to see it all in one day.

Rev. C. F. Hartford and Rev. T. V. Joiner attended district conference at Lewisburg, Ky., last week.

Prof. S. P. McKinney and son, Master Marshall, of Cromwell, were the guests of Mr. H. B. Martin and family this week.

Mr. and Mrs. Lon Twaddell and daughter, Miss Nellie, of Calhoun, Ky., are visiting Mr. W. C. Schenker and family.

Mrs. C. E. Rogers and children will return to their home at Elk-Ky., Saturday, after a visit here with the former's parents, Capt. and Mrs. S. K. Cox.

Mrs. A. J. Casey and sons, Walter and Dudley English, have returned to their home at Lebanon, Tenn., after a visit here with the former's sister, Mrs. John C. Thomas.

Mrs. Martha J. Fogle and Mrs. P. H. Taylor and son, Bradford, of Danville, Ky., were the guests of Judge J. E. Fogle and family and Mr. G. G. Fair and family last week.

Among our callers last Friday were Messrs. Ashford Mills and Lieut. C. B. Show, route 3; John A. Raymond, route 6; James Gray and son, Argyle, of route 2, Narrows; S. C. Taylor, Beaver Dam.

Mrs. Shelby Taylor and children, Hugh Edward and Kittle Lee, of Crawley, La., have been visiting relatives at Beaver Dam for several days.

Dr. L. B. Dean transacted business in Owensboro this week.

The old Gregory building has been torn down and just as soon as the architect's plans and specifications are completed advertisements for bids for the erection of the new Methodist church will be received, and the building erected immediately on this site.

Mrs. T. B. Peirce and daughters, Ruth and Lella, will leave Saturday for Elk-Ky., where they will visit Mr. J. C. Peirce and family. They will be joined there by Mr. Peirce, of Brazil, Ind., and later visit Judge J. E. Fogle and family in this city.

The Ladies Social Club met at Mrs. Hooker Williams' Wednesday afternoon.

Mr. Connor Ford, of Owensboro, visited his mother, Mrs. Dudley Ford, Wednesday.

Mrs. J. T. Houghland, who has been quite ill at the home of her mother, Mrs. Dudley Ford, is much better.

Mrs. W. M. Fair is in Louisville visiting her sister, Mrs. B. F. Zimmerman and brother, Mr. H. B. Taylor.

Mrs. Frank Bradshaw, of Stanley, Ky., is the guest of Judge J. E. Fogle and family and Mr. G. G. Fair and family.

Mrs. A. V. Goodin and children, of Charleston, Mo., are visiting the former's parents, Capt. and Mrs. S. K. Cox.

A fine male belonging to Mr. James Turner, who lives north of Hartford, was killed by lightning Monday afternoon.

Miss Mary Spaulding entertained several friends Wednesday evening for her visitor, Miss Abner Benson, of Chicago.

When you have a visitor call The Republican and tell us about it. This favor will be appreciated by the paper and its readers.

Mr. James Sanders, who has been visiting his brother, Mr. H. S. Sanders and wife, left Thursday for his home in Louisville.

Mrs. T. B. Peirce and daughters, Ruth and Lella, of Brazil, Ind., are visiting the former's parents, Judge and Mrs. J. E. Fogle.

Dr. L. B. Dean took charge of transportation of the mail from Hartford to Beaver Dam and return, Monday morning, succeeding Cooper & Co.

Mr. E. P. Barnes, senior member of E. P. Barnes & Bro., of Beaver Dam, Central City and Burlington, paid The Republican a pleasant call Tuesday.

We will pay cash for Ginseng, Yellow Root and Mayapple—must be well dried and Ginseng not split or string.

W. H. MOORE & SON.

Mrs. Inez Griffin is visiting her sister, Mrs. H. H. Gillespie, of Griffin, who spent the winter with her daughter, Mrs. A. D. Baskin, of Houston, Texas.

Dr. and Mrs. J. B. Tappan and children left Tuesday for a visit with relatives at Central City and South Carolina, Ky. They expect to return home today.

Miss Winona Stevens has returned from a visit with relatives and friends in Louisville, and also attended the meeting of the Kentucky Educational Association.

Hough River Lodge No. 110 Knights of Pythias had a splendid meeting Tuesday night, when an Esquire was taken into the rank of Knighthood. The attendance was much better than usual.

Messrs. John and Dan King have the contract for a sewer that is being dug from the rear of the Herald office to the Fraternity Hall. The sewer will connect all of the houses on this line.

Now is the time to buy a good Cultivator if you are going to buy one. Call and see my stock, anyway.

S. L. KING, Hartford, Ky.

Mrs. Benah Morton, of Equality, Ky., and Mrs. Price Hollows and son, Morgan, of Louisville, have returned to their homes after a visit here, the guests of Mr. T. B. Barnard and family.

Mr. Arthur Kirk, who has been teaching in the South for some time, has returned to his home near Fordville, but will spend his vacation season in Hartford, where he will study law with one of our attorneys.

Ex-Sheriff H. B. Martin took charge of the Hartford post office Monday morning, succeeding the Hon. M. L. Heavlin. Miss Henrietta Guenther, who has been chief clerk for many years, and Miss Esque King have been retained by Mr. Martin.

The Christian revival services closed here last Sunday night after three weeks' duration. The meeting did much good and Bro. Brown and his company made many friends while in Hartford. The evangelistic company left Monday for Princeton, Ky., where they began a meeting.

The advance agent of the Southern Fair Shows was in Hartford last week and made arrangements to hold a street fair and carnival in this city beginning next Monday and lasting the remainder of the week. This company is said to be a first class organization and will have their tents pitched on Washington and Main streets.

Prof. Lawrence M. Gary, formerly of this county, but residing at Plain Dealing, La., for the past two years, and Miss Minnie Hudson, of that place, were married at Main Dealing on June 18 and are now visiting Mr. Gary's relatives in this county. Mr. Gary has been quite successful as teacher in the South and next year will have the gratification of the high school at Cotton Valley, La. The Republican joins in best wishes to Mr. and Mrs. Gary.

GREATER AND GRANDER THAN EVER

Great Hopkins County Fair

MADISONVILLE

July 16, 17, 18, 19, 20

Great Henderson County Fair

HENDERSON

July 30, 31, August 1, 2, 3

Great array of running, trotting and pacing races. High class special attractions, free to all. Something going on all the time. Excursion rates on all railroads.

C. C. GIVENS, President.

J. A. FRANCEWAY, Secretary.

PRISONER ESCAPED FROM JAIL THURSDAY

Will Bennett Celebrated Fourth by Bidding Farewell to Ohio County Jail.

Will Bennett, escaped from the Ohio county jail in this city about 3:30 Thursday afternoon by breaking loose a large piece of sheet iron that had been fastened over a chimney hole in the corner of the jail on the second floor of the building.

Bennett and two other prisoners had been allowed to stay in the corner instead of the regular cells, and it was an easy matter for him to make his escape. He had been in jail since Monday, when he was arrested upon the charge of abduction, and brought here from Williams Mines. He is a young man about 21 years old.

Jailer Midkiff was not at home at the time of the escape. Mrs. Midkiff was at home, but was asleep when Bennett made his escape. A few minutes before she went to sleep she heard a lot of dancing and racket in the jail, but this was not uncommon and she paid no attention to it, later when she went out on the porch that faces the jail building one of the prisoners told her of the jail delivery. The other two prisoners made no attempt to escape, and they were paying out old fines. They claim that they did not know of the escape for they were asleep.

Bennett was tracked from the rear of the jail across the street to Mr. John Duke's residence on Main street, and from there it is supposed he went to the bottoms. Sheriff Black was immediately notified and he and his deputies have been busy since notifying the authorities. Bennett seems to have laid his plans well for his escape for there were not many people on the street yesterday afternoon and practically all of the business houses were closed on account of the day being a National holiday. By going out of the rear of the building was the easiest way to escape detection.

New Liquor Law.

The new law which went into effect June 10 in regard to the delivery of intoxicating liquors in local option territory is as follows:

Sec. 1. That it shall be unlawful for any person, firm or corporation to purchase or secure for another spirituous, vinous, malt, or other intoxicating liquors, mixtures or decoctions either as the agent of the buyer or agent of the seller of said liquors, mixtures or decoctions, either for or without compensation in any county, district, precinct, town or city where the sale of intoxicating liquors has been prohibited or may be prohibited, whether by special act of the General Assembly or by vote of the people under the local option law of this State.

Sec. 2. Any person, firm or corporation violating section one of this act or any part thereof shall be fined not less than sixty dollars or more than one hundred dollars, and not less than ten or more than forty days imprisonment in the county jail, either fine or imprisonment or both within the discretion of the court or jury trying the case.

Sec. 3. The provisions of this act shall not apply to common farmers who in good faith deliver intoxicating liquors in quantities not to exceed five gallons, at one time, to regular licensed and practicing physicians and druggists in local option territory. Providing, however, that the provisions of this act shall not apply to such liquors prescribed in prescriptions from regular practicing physicians.

Poor Editor.

The price of all kinds of print paper has risen "sky high," and many printers and publishers are making much noise thereby. The price on some papers have gone up until it is now almost double the price quoted some few months ago. But the poor printer and editor is compelled to yield to their old prices on work, and still pay the increase. We venture to assert that if the editor sent notice out among his subscribers that on account of this sudden rise, he would be compelled to charge a measly fifty cents additional on a year's subscription, he would promptly receive a few hundred notices like this: "You

are robbing me, and if you can't take a dollar and be satisfied, you can't take a paper and go to Halifax." If the merchant is selling sugar at eight cents and he receives notice that it has risen, he promptly raises his price proportionately and the people pay it. But the editor, can he do this? Nay, nay, he would get it where the turkey got the red. And some are even so indifferent to his distress that they will not pay him the dollar or two that they are already owing for back subscription.

Rained on the Fourth.

Many Hartford people who had arranged to spend the Fourth of July at some of the public gatherings were disappointed yesterday on account of the rain. The rain began early in the evening Wednesday and continued at intervals until nearly noon Thursday, and on this account there were no celebrations around Hartford.

The Fought Cemetery.

The Journal, published at Olaton, Ky., says: Fifteen miles east of Hartford, Ky., on the Hartford and Lexington road, and about a mile and a quarter from the town of Olaton, located on the farm of N. J. Fought, there is a little grave yard, which in the year 1903, contained but one grave, that of Little Eva Fought.

The little cemetery to-day is nearing its tenth birthday, and on June 15, was raised the tenth little mound, and with its tenth year and its tenth mound, the age of the oldest body consigned to its keeping was less than 10 years.

Seven were the grand-children and three great-grandchildren of Rev. N. M. Harris, and all have monuments with the exception of the last three.

NO CREEK

Several of our people attended the singing convention at Red Hill Sunday. The next meeting of the convention will be at Red Hill Sept. 25th.

Miss Myrtle Wilford, accompanied by her mother, Mrs. Taylor Harist, of Beaver Dam, left last week for Owensboro to visit relatives. Born to the wife of Mr. Vaughn, Dec. 10, July 24, a boy.

Mr. and Mrs. James Vertrees, who have been in Owensboro for the past few weeks, are visiting the former's parents, Mr. and Mrs. L. D. Bennett.

The remains of the infant child of Mr. and Mrs. Leonard Liles was interred at Mt. Hermon Saturday.

Mr. Will Higgs lost a horse last week, valued at \$25. This is the fifth horse Mr. Higgs has had to die the last six months.

Mr. James Tanner had a good note killed by lightning Monday.

Mrs. Lonnie Twaddell and daughter, Miss Nellie, after visiting here for some time, left for Hartford Sunday where they will visit before returning to their home at Calhoun.

Mrs. Bertie Lail returned from Owensboro Monday.

Prof. C. B. Shown has been employed to teach the fall school at East No Creek.

Miss Irene Ward will teach at East-nette Creek this year.

Mr. Elvin Renfrow, of Sunnydale, visited his parents, Mr. and Mrs. A. G. Renfrow last week.

Mr. Elvin Henry and family made his parents at Pleasant Ridge a visit Saturday.

Miss Mattie Tinsley spent the week and with relatives near Centertown. Everyone seems to be in fine spirits since it has developed that we are in the midst of an immense oil field.

Was Not Personal Letter.

Mr. J. H. Thomas, of Narrows, Ky., asks us to say that in his letter to The Republican last week under the caption of "Letter to a School Teacher" that it was in no sense a personal letter to the teacher in this district, but a general appeal to school teachers to training of their pupils.

SEMI-ANNUAL STATEMENT

OF THE CONDITION OF THE

Bank of Hartford

At the close of business June 29, 1912.

RESOURCES

Bills Discounted	\$183,826.84
Cash on hand and in other banks	51,027.68
Stocks and Bonds	11,410.00
Checks for Remittance	2,670.13
Banking House and Lot	3,000.00
Furniture and Fixtures	1,000.00
Total	\$252,934.65

LIABILITIES

Capital Stock	\$40,000.00

COOPER & CO.
Hartford, Ky.

Harvesting in Tennessee

HARVESTING OATS AND PLANTING LEGUMINOUS CROPS IN THE SOUTH

By G. H. ALFORD of the IHC Service Bureau

It is now time to plan for the harvesting of our oat crop. If we do not own a good mowing machine, or better still, a good binder, now is the time to buy one. The cradle is too slow and the waste when using a cradle is enormous.

One binder will harvest from 80 to 100 acres—eight acres per day. One or more farmers in every neighborhood should own a good binder. The binder will generally pay for itself in one season.

A mowing machine will often do the work for several farmers in a neighborhood. Where one farmer cannot afford to buy a mower for his own use, several farmers can purchase one. One farmer will often find it profitable to own a mower or binder and work for his neighbors at a reasonable price.

Now is the time to get our mowers and binders ready for work. Let us sharpen the sickles, oil the bearings and test the machines on the grass before our oats are ready to cut. It is also advisable to have an extra binder tongue, a knife, and several extra wings and arms for the reel ready beforehand for repairing breakages.

We should harvest our oat crop early. Cutting should begin as soon as about 75 per cent of the field has turned yellow—just as soon as all the grain is in the dough stage. Oats should not be cut while wet from dew or rain.

There should be a thresher in every neighborhood for threshing all kinds of seeds such as oats, wheat, rye, barley, kafir corn, sorghum, grass seed, beans, and peanuts.

Many farmers will find it profitable to own a thresher for use on their own farms and they can at the same time be of great service to their neighbors by threshing for them at a reasonable price.

The oats should be threshed as soon as possible, but should not be threshed when grain is wet from either rain or dew.

Store oats in bulk and not over three feet deep. Be sure and examine grain daily for at least three weeks and turn with shovel, if there are any indications of heating.

The packed, crusted soil should not be exposed to the sun's rays a single day after oats are cut. We should use a disk harrow and make the surface for two or three inches as fine as possible for a cowpea, soy bean or peanut crop. By the use of the disk harrow, we can thoroughly prepare several acres of stubble land every day for these crops. At this season of the year we are usually very busy and are often unable to spare the necessary time to break the stubble land with a plow.

These leguminous crops are valuable on account of the nitrogen and the humus-making organic matter they contain. When they are harvested to be fed to live stock, nearly half the nitrogen and humus-making materials are left in the roots and in the bottom of the stems and in the leaves, and other portions of the plants not obtained in gathering the crops. The results of the Calhoun, La., experiment station show that one acre of Spanish peanuts grown on poor pine land contained 192 pounds of nitrogen; an acre of cowpeas, 108 pounds; and an acre of soy beans, 190 pounds. These crops made from two to three and a half tons of feed stuff, richer in food elements than wheat bran. When such feed stuff can be grown after oats and fed to stock without serious loss of fertilizing value, is there any excuse for cultivating poor land and for having poor livestock?

The advantages of growing cowpea crops are briefly summarized by the Louisiana experiment station as follows: First, the cowpea is a nitrogen gatherer; second, it shades the soil in the summer, keeping it in a condition most suitable to the most rapid fertilization and leaves it friable and loose and in the best possible condition for future crops; third, it has a large root development, and hence pumps up from a great depth and a large area the water, and with it the mineral needed by the plant; fourth, its adaptability to all kinds of soils—stiff clay to the most porous sand, fertile alluvial bottoms to barren upland; fifth it stands the heat and hot sunshine of hot climates; sixth, its rapid growth enables us to grow two crops on the same soil; seventh, when sown thickly, it shades the soil effectively, smothering out all weeds and grasses, and thus serves as a cleansing crop; eighth, it is the best preparatory crop known to the southern farmers—every kind of crop grows well after it; ninth, it furnishes a most excellent hay and a most excellent food in large quantities for man and beast.

The following is a summary of Farmers' Bulletin, No. 326: In 1905 the farm described in this bulletin produced one-fourth bale of cotton and fifteen bushels of corn per acre. In

1906, after a crop of cowpeas, it produced one-half bale of cotton and thirty-four bushels of corn to the acre. After cowpeas and an application of 300 pounds of commercial fertilizer, nearly three-fourths of a bale of cotton to the acre; and after cowpeas and clover continuously for two years, one bale of cotton per acre.

This mowing machine, thresher and hay press made it possible to utilize the cowpea grown on this farm not only for feed and seed but also as a source of considerable revenue. The mowing machine, the thresher and the hay press will make the cowpea one of the most profitable crops that can be grown.

The following is a summary of Farmers' Bulletin No. 372: Where intensive farming is followed, the soy bean is the best annual legume to grow for forage in the southern part of the cotton belt. The soy bean whether used as hay, grain, or ensilage is a very valuable live stock feed. Soy-bean hay is practically identical in feeding value with alfalfa and yields from two to three tons per acre.

Soy-bean grain is more valuable than cotton seed meal as a supplementary feed in the production of pork, mutton, wool, beef, milk and butter. A bushel of soy beans is at least twice as valuable for feed as a bushel of corn. As the grain is hard, it is usually desirable to grind it into meal for feeding. This is best done by mixing with corn before grinding to prevent gumming the mill.

A mowing machine or a binder can be used to harvest the soy bean. A binder can be used only with the tall varieties. The threshing can be done with a grain thresher by using blank concaves and running the cylinder much lower than for small grain. The growing of soy beans after oats and on other land and the use of mowing machines, threshers, and hay presses means rich land, fat stock, and more prosperous times.

The fact that Spanish peanuts will produce good crops on comparatively poor land when well fertilized and cultivated should encourage us to grow them as a substitute for a large part of the corn and hays usually fed to all kinds of stock. Professor Dugger at the Auburn, Ala., station found an acre of Spanish peanuts on poor gravelly land produced 600 pounds of live weight of hogs. This was after the tops had been cut with a mower and saved for hay. The growing of peanuts after oats will add much to the fertility of the soil, promote the raising of good livestock, and add to the bank account.

Planting cowpeas and soy beans in rows about 30 inches apart saves seed and brings greater returns in yields of seed and hay. The experiment station results show that the increase in both seed and hay obtained when the seed is drilled is more than sufficient to pay for the additional expense in drilling and cultivating the crop.

Plant the cowpeas, soy beans and peanuts on the level and cultivate on the level with a disk harrow, a spring tooth harrow, a one or two-horse cultivator or a heel sweep. We can then cut two or three rows at one time with our mowing machines.

We should grow more oats and other small grain crops, and leguminous crops to enrich our lands and furnish feed for more good livestock; and use more labor-saving machinery such as mowing machines, hay rakes, tedders, binders and hay presses.

BURNING STUBBLE

Frank Connolly, of Brant, Alta., writes as follows: "There is a difference of opinion here as to whether burning stubble before plowing, or grass before breaking, is a benefit or detriment to the soil."

We never advise the burning of stubble on land that is not unusually fertile. Of course under certain circumstances it is best to burn the stubble and get it out of the way, but when one burns a ton of straw he is practically losing \$2.39 worth of fertilizer and this does not take into consideration the value of this straw as humus in the soil.

The best way to prepare your land would be to plow in the fall and then to harrow in the spring before using the drill, but of course as this is impossible now, the only thing you can do is to prepare your land as well as you can this spring before seeding time.

Where the stubble is very heavy, indicating that the land is unusually fertile, and in your particular case, it probably would be the best thing to burn the stubble, as it prevents the land warming up early in the spring, and it also reduces the danger due to drought. But the best way, if the stubble is not heavy, is to plow the land and follow the plow with a land packer. This will re-establish the soil capillary; then if you form a dust mulch by using the peg tooth harrow, it will prevent the evaporation of soil moisture.

HELPING THE WOMEN

The cream separator is one of the few things which specifically alleviate the drudgery of the woman whose lot has been cast on the farm. No better argument can be advanced for the increased sale and extended use of these machines. The man who places a separator on a farm has done something for humanity. In the city, when a housewife has cooked the meals, washed the dishes, and otherwise cared for a little flat with running water, steam heat, and electric lights, her whole duty toward man is done. Whereas, in the country a woman's work is never finished. Give the average farmer's wife only the housework to do and she would think she was on a vacation. It is this inequality of labor which starts country girls cityward. It is a lamentable commentary on the lack of chivalry in men but, in every rural community in which the writer has visited, the average head of the house always has money to buy labor-saving machines for himself and sons. He is thoroughly up-to-date in that, but when the patent washer, the fireless cooker, the carpet sweeper, the water system, and the lighting plant are advocated by the junior partner, funds are always low. This condition is not so bad as it used to be—prosperity has opened the purse strings—but there are still opportunities for betterment. The cream separator is one of them. It fills a need felt by every woman from Leah down to the 1911 Ames co-ed, and even if it did not increase the farmer's dairy profit one iota, it is worth its weight in gold for the labor it saves the mothers, wives, and sisters on the farm.

THE SELECTION OF A CREAM SEPARATOR

By T. F. WILLOUGHBY of the IHC Service Bureau

The selection of a separator is not a difficult matter if the farmer will bear in mind a few simple facts.

Cream and skim milk are separated in the cream separator by the action of centrifugal force. Centrifugal force is a force exerted outward from the center of the separator bowl and is produced by revolving the bowl at a high rate of speed. Just what the action of centrifugal force is can be best explained by a simple and often-used illustration.

When a ball attached to the end of a string is swung around in a circle, the ball, because of its weight, will exert an outward pull. The force exerted on the ball, which makes it try to get away from the central point around which it is whirling, is centrifugal force. When whole milk enters the separator bowl it is acted upon by centrifugal force and the heavy milk solids are thrown to the outer wall of the bowl. The butter fat, which is the lightest part of milk, is not so strongly affected, and gathers near the center of the bowl where it mixes with a small amount of skim milk and forms cream.

The interior of a modern separator bowl

The amount of centrifugal force exerted outward from the center on the milk in a separator bowl is determined by the speed and diameter of the bowl. As the diameter of the bowl is decreased the speed at which it is revolved must be increased or there will be a loss of centrifugal force.

This can also be illustrated by swinging a ball attached to the end of a string in a circle. The greater the length of the string, the greater the pull exerted. As the string is shortened, it will be noticed that the pull it exerts decreases unless the speed at which it is whirled is increased. Therefore, in a bowl, which has a comparatively large diameter, the maximum centrifugal force is secured without running the bowl at an excessively high rate of speed. This means greater durability because it reduces the strain upon the operating mechanism.

Centrifugal force is what causes separation in all cream separator bowls, but there are several conditions which affect the thoroughness of its work. The first separator bowls made were hollow and centrifugal force was required to act upon the milk en masse. It was necessary that these bowls be revolved at an excessively high rate of speed to insure sufficient centrifugal force being developed to force the milk solids, other than butter fat, through the thick wall of milk to the outer edge of the bowl. Furthermore, the results were uncertain,

as there was no provision made in these bowls to prevent the intermingling of cream and skim milk that had been separated.

Most separator bowls are now equipped with an interior device composed of a central milk-feeder shaft and a number of disks. The disks divide the milk into thin layers or sheets and centrifugal force acts upon each sheet of milk independent of the others. The disks increase the capacity of the bowl and reduce the speed at which it must be revolved by eliminating the necessity of forcing the skim milk solids through a thick wall of milk. The use of disks has now become a standard feature of separator construction.

While it is true that the separator bowl does the actual work of separation, the mechanism which revolves the bowl is of the utmost importance. In fact, the design and construction of the operating mechanism will determine the length of time the machine will do good work.

Good material and workmanship are necessary to a separator. The truth of this is often overlooked when the machine is new, but the farmer who buys a high grade separator will appreciate it after he has used the machine a few years as he will realize that he has a machine that will do good work for many years. That is the real test of a separator after all. Any separator that will develop centrifugal force will do good work for a time, but for

Spiral gears of a cream separator

long service it must contain the highest quality of material and workmanship and be designed to accomplish a thorough separation of cream and skim milk without tearing itself to pieces.

Spiral cut gears are now used in the best separators because they run smoothly and prevent jarring, loose or unsteady motion, or back-lash. They do this because they have four teeth in mesh where spur cut gears have one tooth in mesh at a time. The slightest jarring or unsteady motion in the gears will be transmitted to the bowl and will cause it to vibrate and do poor work. Hence, the value of smooth-running spiral gears can easily be appreciated.

The quality of material used in making the gears will materially affect the amount of wear they will stand. Tough, close-grained iron is the best material for this purpose as it wears smoothly and does not grind or cut.

The shafts, spindles, and frame of a separator are among the most expensive parts of the machine and should be protected from wear as much as possible. In the better grade of cream separators, phosphor bronze bushings are used to protect the frame and operating mechanism. This is a very smooth, fine-grained metal which does not cut the parts moving in it. It is slightly softer than the steel shafts and spindles which move in it, and consequently bears the burden of wear. Herein lies its value as the bushings can be replaced at a very small cost whereas it would be a considerable expense to replace the shafts, spindles, and frame.

The bowl spindle or neck bearing of a separator is one of the features a farmer should carefully investigate. The purpose of this bearing is to keep the bowl properly centered and to prevent shocks or vibrations from being transmitted to the bowl from the gears. This bearing to be satisfactory must be strong, simple, and free from the necessity of difficult adjustments. The fewer parts the bearing has the better, providing the parts are properly made.

Every farmer naturally wants a separator that is easy to turn. By all means a separator should be easy to operate, and many of them are, but unfortunately for the purchaser this quality is often secured by building the machine light—by sacrificing durability. It is poor business sense to buy a light, flimsily constructed separator simply because it is easy to turn. Such a separator will not stand up under the work for a long enough period to be a profitable investment.

Milk as it comes from the cow is one of the purest articles of food, but it is also very easily contaminated. Therefore the separator bowl must be kept in a clean, sanitary condition. Don't judge the easy-cleaning qualities of a separator by the number of pieces the bowl contains. What is infinitely more important is the construction of the parts. A plain, smooth surface is easily cleaned, whereas, intricate crevices and corners are hard to get at and will often be improperly cleaned.

In selecting a separator do not be misled by the price. Those who try to sell a machine and use as their strongest argument its low price, often use this argument because they have no other. The man who is selling low-priced machines is making just as much profit as the man who sells a high grade machine at a slightly higher price. The difference is in the quality of the machine.

THE BUSINESS OF FARMING

By J. E. WAGGONER, of the IHC Service Bureau

A great deal has been said in a popular way about the razor-back hog and his sun-splitting abilities, but it is a very encouraging fact that he is rapidly becoming extinct. His happy hunting grounds consist now of only a small part of the total hog producing area. He has been succeeded by the more domesticated and more highly developed type of hog, which someone has properly dubbed "the mortgage raiser." Many farmers can easily attribute the possession of homes, wealth and all that goes therewith, to the domesticated hog. His place in the scheme of industrial progress has been won not by any unusual trait, but is largely due to the fact that his profitability is a result of instinctive economical habits. By nature he seems to fit into the whole scheme of farming as a utilizer, to the best possible advantage, of many of the farm products that would otherwise be a total loss.

We can draw a very valuable lesson from this all but artistic animal, whose only language is his squeal of disapproval and his sturdy grunt of satisfaction. He saves where others waste, and makes his living by rooting around—sometimes in places where wanted, sometimes not. If there is anything within reach that he likes he usually finds it and proceeds to make good use of the opportunity without any manifest concern or excitement. He seems to make it his business to look after small things, even the holes in the fence if the outside looks more inviting.

Profitable farming is becoming more and more a business proposition in which it is necessary to look after the small things and to use to the best advantage every opportunity to produce more economically. The best and most profitable farmers have adopted systems of farm accounting, or, in other words, they have become bookkeepers.—have kept such complete records as to enable them to determine which fields were profitable and which were not. To begin with, it is not absolutely necessary to follow up all little details, but it is a good plan to do so as completely as possible.

If we were to go into a manufacturing plant, one of the first things to impress us would be the system of doing things and the strict principles of economy that are followed. All products that can be used for other purposes are saved, properly stored, and used when the time comes. At the end of each month, and possibly each day, the manager knows the exact status of affairs—the amount of stock on hand, and the quantity of finished product ready for the market. Every part of a great machine is numbered and each must be accounted for.

If the same unsystematic methods were practiced in factories as are used on some farms, they would soon lose their identity with the world's progress, and become nothing but idle monuments to some man's failure. On careful consideration it is plain to see that with farming it is as important, if not more so, to keep definite and strict records of all expenditures of time, money and labor.

The space allotted to this article will not permit a detailed explanation of all the possibilities of an accounting system on the farm and what it will accomplish, but carefully kept records will be an index finger to point the farmer to loop holes through which the profits are now slipping. He would know which are the profitable fields; which are the most profit producing crops; which cows were boarders, that he might at the end of the season sell such animals to pay their board bills; he would know whether he was utilizing his horse power to the best possible advantage. In this connection it might be said that one of our foremost universities has just found that on a 160-acre farm, equipped with six splendid head of work stock, the average daily labor per horse was only a little over three hours for the entire year—a very small average labor record, indicating a lack of efficiency.

Well kept accounts would enable us to determine the most satisfactory way of utilizing our dairy products. Experiment Stations have found that the cream separator reduces the loss of butter fat per cow to one-eighth that of the deep setting; one-twenty-first of the shallow pan, and one-thirty-third of the water dilution methods of cream separation. This shows that with the ordinary farmer who is milking ten average cows, figuring butter at the market price, will save more than the price of a separator in a single season. It not only is economical from the standpoint of obtaining more of the butter fat from the milk and other methods of cream separation, but makes it possible to utilize the milk before it has undergone the action of detrimental bacteria, to which it is very susceptible. Every farmer knows that milk as it comes fresh from the separator is in the most wholesome condition for feeding young pigs and young calves.

We hear a great deal said nowadays about maintaining the fertility of the soil. We all know that if grain is sold direct on the market that we deplete the fertility of the land very rapidly. The next best system of farming is stock raising for meat production, and the best of all systems for maintaining the productivity of the land, and at the same time reap profits therefrom, is dairying—not selling the whole milk but selling butter only.

Only by following some system of farm accounting can we know these things and be able to weigh in the balance the returns from each field from each kind of stock and from every farm operation.

VERY WONDERFUL

Miss Fulett—Don't you think she's a wonderful actress?
Mr. Barnes Tormer—Snap. Why, she has been on the stage for 30 years and hasn't had a divorce yet.

WHAT DID HE MEAN?

The Judge—No, my conscience doesn't hurt me when I give a man a life sentence, if I'm sure of his guilt. But I suppose yours does?
The Preacher—How do you mean?
The Judge—Why, you sentence many innocent men for life and then collect a fee for doing it.

NO WONDER

I. M. P. Cuntus—I had a hard time this morning to make a man take \$10. Goetz Dunn—You don't say! Who was he?
I. M. P. Cuntus—My tailor, and I owe him \$100.

A DEFINITION

"What's a 'chaser', pa?"
"An afterthought, my dear."

NATURALLY

This world is but a fleeting show. And yet there's not a man But wants to see as much of the Performance as he can.

The Pool of Flame

CHAPTER XXVII.

"Danny . . . said O'Rourke without looking up from the occupation which had engrossed his attention for the last three hours; and for the first time in that period he spoke audibly, making an end to the mumbled confabulation he had been holding with himself, a Murray's Guide, a Bradshaw, an Indian railway guide, several steamship folders and a large colored map of the Indian empire.

"What day's this day, Danny?"

Danny thought laboriously. "Twas this morn' ye lift th' Rance, sor?"

"Thin yestiddy was Wednes-day."

"And today Thursday, be logical progress of reasoning, eh?"

"Aw, yiss, sor."

"And what's the time?"

Danny consulted O'Rourke's watch on the bureau. "A quarter av twilve."

"Then bestir yourself, ye lazy good-for-nothing, and pack up me things."

"Aw!" cried Danny, expostulant. "Our train leaves at two. Ye have an hour and a half."

"Aw, but yer honor, is at no risk at all we'll ever be havin'?"

"Ye can rest on the train," said O'Rourke. "I've just ten days left in this to reach Rangoon, where I've an appointment to keep with a lady, Danny, to wit, Madame O'Rourke. D'ye mind her, and do ye blame me, Danny?"

Danny became suddenly extraordinarily busy. "Why did ye not say as much to begin with, yer honor?" he complained. "As if I wouldn't work me hands to the stumps av thin."

"Tis now Thursday noon," continued O'Rourke thoughtfully. "The two o'clock train's scheduled to land us in Calcutta at ten Saturday night. At eight Sunday morning a steamer leaves Diamond Harbor for Rangoon, scheduled for a fair-weather passage of three days. That'll leave us a little leeway, barring accidents. But we've no time to waste."

"But how'll we be catching that steamer at Diamond Harbor, sor? How far's that from Calcutta, now, an' will there be thrains at that hour av the night?"

"That's to be dealt with as it turns up, Danny. There's only forty miles between the two places, and if there's no train, we'll charter a motor-car or a boat down the Hughli."

The latter expedient O'Rourke finally adopted, although he could have afforded a comfortable night in a hotel at Calcutta, had he deemed it wise. But in the fifty-six hours of unmitigated aweltering that he and Danny endured in their flight across India he had leisure to think matters over very carefully, with the result that, all things considered, he felt justified in assuming the world to be in league against him and in shaping his course accordingly. Therefore it were unwise to permit himself to be seen and recognized in Calcutta, or even to linger on the soil of India an instant longer than absolutely necessary.

Within an hour, then, of his arrival at Howrah, he had, by dint of persistence and ruses, succeeded in hiring a launch to take him from the terminus by water to the steamer at Diamond harbor—

(To be continued.)

Children Cry FOR FLETCHER'S CASTORIA

The Poultry Yard.

BREEDING STOCK.

One of the large sources of income from poultry raising during the past few years has been from eggs, day-old chicks and stock for breeding purposes. For this use eggs, chicks or stock from scrub stock brings only market price, while eggs from pure-bred stock bring from \$1 to \$10 a setting of thirteen to fifteen eggs. Fanciers owning prize-winning stock have little trouble in obtaining much larger prices. Every season thousands of full-blooded birds are sold at from \$5 to \$25 a piece, and some where several hundred dollars have been paid for a single bird or pair not uncommon. Full-blooded utility fowls, that for ordinary purposes are as good as prize-winners for \$1 to \$5, according to the strain. While the great majority who raise poultry are not interested in prize-winning stock, by spending a little more money in the first place they may secure

full-blooded stock that will always yield a larger income than mongrels, and the pure-bred stock have a possibility of producing several times the income. If time can be given to selection and to the sale of eggs, chicks or stock for breeding purposes.

AMERICAN FOWLS BEST.

Always try to improve the breed by selecting the finest birds for the breeding yard. The selection of one breed out of the lot of over 100 standard-bred fowls depends on the care and attention which they are to receive and the place in which they are to be kept. For egg production alone the Mediterranean class will be found profitable. They are light-weight, nervous birds that as a rule are fine layers. They are poor mothers and too thin to be dressed with the desirable table fowls. These birds are popular on the large egg farms that are scientifically run and equipped with incubators and brooders. For the average poultry raiser who keeps a few fowls in his back yard, and the farmer who wishes both eggs and meat, the American class is most desirable. The egg production is good and the fowls are best for the table and command the highest prices in the markets. They are good mothers and as a whole are easy to raise. Among the well-known birds of this class are Plymouth Rocks, Wyandottes, Rhode Island Reds, Dominiques and Jays. The Orpingtons, while not in this class, but in the English class, are also desirable all-around fowls. In addition to this, there are also many other classes and birds, each having some distinctive qualities, but as a rule not suited to the average poultry raiser.

MANAGING CHICKS.

Keep the chicks out of the wet grass in the early morning. It is not the wet feet that do the harm, but the wet feathers.

The incubator is much better than the hen for hatching chicks. It doesn't breed flies and the chicks obtain a good start in life.

The market has never yet been overstocked with good broilers. Much of the stock coming into the market is of the indifferent kind.

Even a warm rain is harmful to young chicks. See that they have shelter that they can quickly go to during heavy showers.

The outdoor brooder at this time of the year should be in the direct rays of the sun. Under an apple tree is a good place. If no trees are available use a mesh frame over the brooder.

From now on fight lice—Poultry's worst enemy, the cause of stunted chicks, slowly murthering fowls and many ills. They are ever present, if not they soon will be.

Top-dress the poultry yards and runs with slaked lime and plow it under, and grow a crop like corn, that makes a rank growth and needs cultivating. Keep the soil sweet and many ills will be avoided.

Know the drinking water often now the weather is warm. Keep the drinking fountain clear. A good stiff brush cleans them best, and it is easily carried when watering. Don't make the mistake that any water is good enough for poultry. Give them water you would consider fit to drink yourself.

As the chicks grow, be sure that there are not too many in the coops. Thin out the flocks often to avoid overcrowding—a fault indulged in by even the more experienced poultry raiser, and which always retards growth.

See that the coops for growing chicks have plenty of ventilation. They suffer from heat the same as the human race, and need the cool when it can be obtained. Take out the glass and leave the front open.

Only One Mother.

You have only one mother, my boy,
Whose heart you can gladden with joy,
Or cause it to ache
Till ready to break—
So cherish that mother, my boy.

You have only one mother who will
Stick to you through good and through ill,
And love you although
The world is your foe—
So care for that love ever still.

You have only one mother to pray
That in the good path you may stay;
Who for you won't spare
Self-sacrifice rare—
So worship your mother alway.

You have only one mother for make
A home ever sweet for your sake,
Who tells day and night
For you with delight—
To halcyon all gains ever make.

You have only one mother to bid
When she has departed from this;
So love and revere
That mother while here—
Something you won't know her dear lass.

You have only one mother—just one,
Remember that always, my son.
None can or will do
What she has for you.

\$100 per Plate.

was paid at a banquet to Henry Clay, in New Orleans in 1812. Mightily costly for those with stomach trouble or indigestion. To day people everywhere use Dr. King's New Life Pills for these troubles, as well as liver, kidney and bowel disorders. Easy, safe, sure. Only 25 cts at All Druggists.

HAVE LADIES BAND AT VINE GROVE, KY.

Only Organization of This Kind in the State.

The Elizabethtown Mirror says: The Ladies Concert Band, of Vine Grove, is gaining quite a reputation as a musical organization, and has made engagements to play for a number of fairs and other public gatherings this summer.

The band was organized just one year ago and is composed of sixteen ladies of the best families of the Grove. It is the only band in the State whose members are women. A handsome new uniform has just been purchased which will be worn for the first time next Saturday night when the band will play for an entertainment at Kosmosdale, Ky. Other engagements of the band to date are as follows: July 4th at a big Barbecue at Irvington; at the Simpson County Fair, Franklin, Ky., and at the Scottsburg, Ind., Fair, both of which take place in August; and also at the coming Hardin County Fair.

The band was highly complimented recently by the Louisville Boosters when they visited The Grove, and a picture of the band appeared in The Louisville Times in connection with other scenes witnessed by the Boosters on their trip.

Life's Now.

Isn't life strange to you? Isn't it a perpetual, progressive, mysterious mystery? If it is not, it must be a very prosy, commonplace thing with you. With your eyes, dear reader, and from a new standpoint take a good, steady fresh look at life. "Now." That is the way the Word puts it. Today, tomorrow, and through all this mortal stage of life—what? We see imperfectly, darkly through a glass. What is it, that we see? Not only the familiar surroundings of this life, but the realities of the life to come, in part, pass in dim review before us. Do not reject this statement until you have looked carefully into the subject. This may sound strange to you, dear reader, but if you will compel yourself into a proper realization of the mysteries of the "Now," you will begin to realize that the mysteries of the "Then" are also involved. We look forward with wonder and doubt upon the life to come, not properly considering that life now is really the life to come, already in development and progress, and not knowing, some of us, that a system of philosophy has long been held by eminent thinkers which throws our actual existence now as much into doubt with which skeptics would regard the life to come. There is nothing real: All that we see, or think we see, exists only in the imagination; so say the learned, metaphysical, philosophical fools. They do not even stop to help us out of the dilemma—where comes the imagination? To be sure, disembodied, angelic, spiritual life as we now contemplate it, seems passing strange, but it is perfectly natural for the wonder and enchantment to lie in the distance. What can be more wonderful, if we only have the divine gift, the poet's eyes to see than this present life? We are cheated and deceived if we see it not. We shall look back upon life as we now live it in the body, with as much wonder as we now look forward upon life as we shall then live out of the body. There is only one life, one stage being a part and a prophecy of that which is to succeed. You and I, dear reader, had a being before we had a birth, and existence in the one stage is as no more wonderful or real than in the other. So shall life go on up the scale of continuous development, the wonder of our existence. If we are not watchful, always flying backward to the "land of Babel people," or forward into the invisible and angelic. See to it, my friend, that you are not robbed of the true meaning and importance of the "Now." The now with every man is the ship's length pressing upon the deep and stormy sea of life. How important that she be well manned and her hull kept intact now. "Now is the day of salvation." Today, hear.

No wonder that many subtle theories spring up among the meditative and thoughtful, for when we come to what is called maturity, and the mystery of life is in any degree penetrated or realized, experiences and sensations come to the soul which cannot be defined. There are moments when impressions come to us as if they were voices of a previous existence. Voices from the long-ago, or down the prophetic galleries of days and years to come. Who has not realized something akin to this? And whence come these strange impressions? As

PICNIC

The picnic season is rapidly approaching. We wish to announce that we are prepared to print your picnic bills on short notice. Best service at least cost. Did you ever notice that the picnic which was best advertised had the largest attendance, and consequently was the most successful? Come and see us and let us tell you how to advertise your picnic.

THE HARTFORD REPUBLICAN

Hartford, -:- Kentucky.

Life pours its cumulative results from one stage over into another, might they not arise from the exercise of undeveloped faculties in infancy and childhood—from baby-thoughts and baby-dreams which passed from the consciousness with the thinking and the dreaming, but which left a strange and unaccountable impress upon the brain? Or do they come to meet us from the immortal future, like the rushing carriages in the streets, whose echoes we hear on the left, come unexpectedly upon us from the right?

As this may be, when we reach the period of full faculties and begin thoughtfully to consider, we often feel as if we had come by unconscious steps, or as if we had dreamed ourselves into the midst of strange and unaccountable surroundings. Life seems to be a fragment of some grand whole, all of which we cannot grasp. Life, truly, is real, now—today—awfully real or ten thousand broken, wounded spirits; but even the realities of today are hung with the drapery of mystery and wonder, tomorrow they are gone and only exist as creatures of memory. We stand always in the mysterious "Now" with the long shadows of memory and hope met and photographed at our feet.—Word and Works.

GRANT GAVE HIM COURAGE

A Captain Under Fire for the First Time Was Badly Frightened.

One of General Grant's newly appointed staff officers had never been in any serious engagement. But almost the first day that he reported to Grant he was placed under fire of the hottest and most severe kind. The screaming of the balls, the roaring of the cannon and the sharp crack and rattle of the musketry thoroughly demoralized him. He became absolutely sick and paralyzed with fear. He was so weak from nervous excitement that he lost physical control over himself.

General Grant came up at the very climax of his fight, and, noting his pale face, his blue lips and chattering teeth, he said: "Captain, you are frightened. That is natural enough. You will get over it. Suppose," continued Grant, "I should come to you with a hat containing ninety-nine white beans and one black bean would be very good? Well, thrust your hand into the hat at a venture and pick out the black bean; do you think your chance of getting that black bean would be very good? Well, your chance for being hit under this fire is no greater than your chance for drawing the black bean." This officer at once took heart and from then on he never showed the slightest sign of fear.—Life.

"The Culture's Claw" is full of Christianity, complications comedy, romance and tragedy and written by Rev. C. F. Wimberly, who held the Methodist revival in Hartford recently. It is a wonderful book and we are offering it and The Republican for one year for \$1.00. Send your orders before books are exhausted.

POSITIONS GUARANTEED

WE will GUARANTEE you a position if you write us real soon. We need many more students at once to supply the enormous demand for our graduates. As soon as we get the required number of students this offer will be withdrawn. So write at once for particulars.

SKETCH OF GOV. WILSON

(Continued from first page.)

refuge as the best thing he has done in the field of education.

When Mr. Wilson, after twenty-five years of service as an educator, resumed the presidency of Princeton in 1910 to accept the nomination for Governor of New Jersey, there was a general tendency to look askance at the "schoolmaster in politics."

Mr. Wilson was elected by a plurality of 50,000 votes and became the first Democratic Governor which New Jersey had had for sixteen years. It was this sweeping victory in a State that had been consistently hostile to Democratic principles that brought the former college president prominently into national notice.

The platform on which he ran pledged his party to the enactment of a workmen's compensation act, a reform of the election laws of the State which would make direct nominations possible, certain practices not and a public utility commission bill.

In addition a law was passed authorizing municipalities to adopt a commission form of government as well as several other measures of reformatory character. While his success in obtaining the passage of these measures served to bring him more prominently before the public it was his fight to obtain the election of James E. Martin to the United States Senate to succeed Senator John Kean which probably focused the most widespread attention upon the New Jersey Governor. In his presidential speeches Gov. Wilson had given the pledge: "The people of the State will be the boss, the only boss."

When James Smith, Jr., leader of the State "machine" which nominated Gov. Wilson, let it be known after the election that he expected the senatorial seat, the Governor repeated the promise of Mr. Martin, who said: "I have chosen in the popular primary, Gov. Wilson won his fight."

In his political decisions, Gov. Wilson was not swayed by the "machine" and he had cracked in the Legislature. Current opinion in many quarters was that the Governor had received a rebuke for his reversal of the previous year, but Mr. Wilson's adherents claimed that he had been "kicked" by the bosses of the Democratic "machine." In the New Jersey presidential primaries the Governor's victory was so complete that popularity by sweeping every district except two in which Smith and James Nugent made a big fight against him. Of the twenty-eight delegates to Baltimore, twenty-four were pledged to Wilson.

PALO.

Mr. John White went to Hartford last Monday.

Mr. How Coy and family, Mr. Rex Howard and family, of Concord, Mr. Elia Powers and family, of Summerville, Mr. Hugo Powers and family, of Palo, Mr. J. T. Hines and family, of Sunnyvale, W. S. White and family, Mr. William Coy and family and Mr. Andrew Hines and family spent the day last Sunday with Mr. Orval Coy and family.

Mr. Tom Wilson, of Narrows R. 2, 2 was in our midst last Sunday.

Mr. Earl Madden went to Safford Sunday last Sunday.

Mr. Alonzo Barthel and family visited relatives near Tuffy last Sunday.

Mrs. Mary Callahan and Mrs. Wm. Patterson visited Mrs. Anna Anglen last Sunday.

Mr. H. O. Dula and family, Mr. Lee Mader and family, Mr. K. B. Berry and family, Miss Bond and Dwyer and Miss Eva Hines took dinner with John M. H. last Sunday.

"There was an ice cream social, given at Mr. Allen Dukes last Monday night. There were several present and all had a good time."

We are more than glad to get The Vermontian every week for it brings us all the news.

Deaths in Coal Mines.

Washington, July 2.—That the high toll in the 1910 death rate in American coal mines has been reached and passed is the confident belief of the officials of the United States Bureau of Mines.

Figures issued today by the bureau show that 251 men were killed in the mines last year as against 241 in 1910. This shows a reduction in the number of lives lost of 37 in one year's time. The death rate in 1910 was 1.11 men in every 1,000 employed. This rate in 1911 was 1.17.

Compared with 1901, the darkest year in the history of American mining, when 319 men lost their lives, 1911 shows a decrease of 68 in the number of men killed. It was following the record of this year that Congress authorized the government to begin investigations looking toward a reduction in the death rate and this was accomplished in 1911 by the creation of the Bureau of Mines.

Discussing the death statistics of the coal mines, Dr. Joseph A. Hannon, di-

rector of the Bureau of Mines said: "While these latest mortality statistics in the coal mines of the country show slight improvement over the previous years, the United States has still no reason to be proud of 10 spalls of the progress so far made, as we are still far below the standard of safety that we ought to have reached."

It is of course comforting to know that for each year since 1901 there has been a decreasing number of men killed for every million tons of coal mined, and that for every 100 men who have been taken out of the earth since that time, there has been a corresponding increase of coal. This is an improvement in the right direction, but what within the next year or two we will see as great an improvement in the reduction of the number of men killed per 1,000 men employed.

"The bureau is co-operating with the State Mine Inspectors, the mine workers and with the mine operators in an endeavor to solve many of the difficult problems connected with the coal mining industry in this country. In this effort all the above forces are co-operating in good spirit in the determination to bring about better conditions. In this co-operative effort there is also serious need of the Statesmen. No amount of industry in this country is so great as to make heads today as is the coal mining industry, and this industry can never be placed on a satisfactory basis until, through important legislative changes, improvement in this economic factor is made possible."

It was only in 1908 that the Federal government began its investigation of the causes of mine disasters following the climax of accidents in 1907. The record for 1907 and the following years is as follows:

1907, thirty-two hundred and thirty-seven men killed, or 1.8 in every 1,000 employed.

1908, twenty-four hundred and twenty-nine men killed, or 1.4 in every 1,000 employed.

1909, twenty-six hundred and sixty-eight men killed, or 1.6 in every 1,000 employed.

1910, twenty-eight hundred and forty-four men killed, or 1.6 in every 1,000 employed.

1911, twenty-five hundred and seventy-seven men killed, or 1.7 in every 1,000 employed.

For Sale.

Well established Dry Goods, Shoe, Clothing and Millinery business in Hartford, Ky. Splendid chance to go to pleasant and profitable business. Will sell at a good discount. Good factor's lease stock, without the usual amount of dead stock. If interested, see us promptly.

Sheriff Olds County.

HEAD OF NEW CHILDREN'S BUREAU

Miss Julia Lathrop, whom President Taft selected as chief of the newly created children's bureau in the department of commerce and labor, has long been prominent in Chicago and the country generally as a social economist. She is an associate of Miss Jane Addams in the work at Hull House, a member of the Illinois board of charities and a graduate and trustee of Vassar college.

On the Diamond.

Quite a large number of baseball fans gathered in Hartford Saturday afternoon to witness the game between Hartford and Melleny. This was the first game played in Hartford this season, but the same old time enthusiasm was manifested.

The score: Hartford... 9 1 5 6 1 1... Total 21. Melleny... 0 0 1 0 0 5... Total 7. In the fifth inning Ray Bradstreet, Hartford player, was disabled on account of being hit in the head by a pitched ball, Herbert King, of the Hartford team, was substituted, but was not in time when it came to batting.

The home run in the third by Clinton for Hartford was one of the interesting features.

The fans and players appeared to be universally agreed that all of Hartford's baseball devotees were on "the base."

The diamond Saturday afternoon

PEZZIE FIND FINGER HUNTER

scattered in last year's cornfield. I never mind we had a ball game.

Before the game many were heard to express confidence in Melleny who, to the game, but the Hartford team was too strong. How you, in the sixth inning the Melleny made the Hartford team rather uneasy.

Only seven innings were played here.

It was intended that the Hartford team should play the winning team of the first game, but because of rain was a case of not playing the second game.

Hartford boys say they want to play Hartford some time soon. Hartford boys say "come to you."

While Melleny did not win the game, yet it had a fine heavy of full bodies that did their part well.

The Hartford baseball aggregation has not lost a game this year. Nor has it played one.

Yes, Lee Stevens, of Beaver Dam, was present. The game would not have been played without him. There was also a good bunch of fans from Beaver Dam.

While Hartford, of Hartford, saw the game, and really he was more interested in the game than his son who was along with him.

Every mention of the name of Hartford's baseball manager, old Hartford,

CHINN BEAT IT FOR HOME, SWEET HOME

brought forth cheers from the thousands of fans.—P. S. Hez told us to say this about him. Paid advertisement.

A movement is being pushed, whereby Hartford will have an up to date ball park and the swiftest amateur team in Western Kentucky. Keep the ball going, fellows. This would be worth a great deal to every business man in our town.

As usual after the game some little made a home run with a good ball. He was the best.

Those who participated in the game were: For Melleny, Troup, Smith, Williams, Anderson, C. Smith, McDox, Williams and Kerkell. For Hartford, Clinton, Bradshaw, Chamberlain, Bell, O'Rourke, Nance, Porter, Hall and King.

A. C. Porter is an old time ball player who was lined up with Hartford. He was all right everywhere, except when it came to running.

For Sale.

Great big box. Suitable for large family, restaurant or boarding house. Will sell cheap. See W. H. HILLY, 622 Hartford, Ky.

PINCHECO.

The friends of Miss Catherine Stevens gave her a fine birthday dinner on the 21st day of June. Mrs. Stevens is 52 years old and is the mother of Mr. S. J. Stevens, and Mr. S. T. Stevens, is married, former sheriff of our county, also two daughters, one was the wife of Rev. J. P. Taylor and the other the wife of Rev. W. C. Taylor.

Those present were Mrs. J. M. Williams, Mr. E. L. Taylor and wife, Mrs. James Jackson, Mr. J. W. Cox and wife, Mrs. S. T. Williams, Mrs. J. P. Colman, Mrs. C. S. Taylor, Mrs. Charlotte Taylor, Mrs. C. J. Rogers, Mrs. C. M. Stevens, Miss Nina Stevens, Mrs. Mary Burgess, Miss Jessie Burgess, Mrs. Bessie Colman and daughter, Mrs. T. B. Black and daughter, Made and Baby, Mrs. Byron Taylor, Misses Eva, Zora and Eva Taylor, Mrs. John Allen and daughters, Francis and Edith, Miss Minnie Bond, Miss Golda Smith, Mr. James Black, Mr. and Mrs. S. J. Stevens, and Mr. Gordon Stevens. All seemed to enjoy the day and grilling of old friends.

Mr. L. M. Gary a former student of Hartford College and now of Platt Dugling La., is at home now for a visit to relatives. Mr. Gary has married Miss Minnie Hudson, of Platt Dugling La. He is one of the principles of the Clinton Valley school for the coming year.

Mr. E. S. Howard will begin school at No. 19 on July 8th and will be assisted by Miss Myrtle Williams, of Hartford.

Mrs. S. F. Gary has returned home from a visit to her son in Missouri.

It's a Rare Chance!

Our customers are getting the benefit of the low prices on our Merchandise. We are preparing to quit business and are certainly moving our stock in splendid shape. Are you getting the values we are giving? Come to us for anything in our line. We will save you money—and will furnish you nice, dependable Merchandise, too. Let us fit you with a pair of our Shoes. It is nice to save from 50c to \$1.00 per pair and get better shoes, too!

Barnard & Co.
Hartford, Ky.

Listen! Feel good in our good feeling Furnishing Goods.

Underwear that "draws," socks too small or too big, shirtsleeves short or long, a collar too tight—furnishings that don't "fit"—make life miserable.

No matter how well your suit fits, your furnishings must also "fit" if you have that "well-dressed" feeling.

We carry enough furnishings to "fit" narrow men and broad men, long men and short men.

You cannot afford not to wear the best furnishings you can buy. That's the kind we sell.
